# Emergency Panic System

- Emergency Panic System is designed to alert the designated people that there's an emergency situation and they can respond in a timely manor.
- All alarm transaction is recorded and will be shown in software.
- Guard is required to check at site and re-arm the unit once alarm is trigger.
- With optional EM Locking Mechanism.
- Real time Map Monitoring with alarm notification at PC and local site.
- Reducing man power and time spent on patrolling the premises.
