MF61

WEB User Manual

【Contents】

一WEB Configuration一

◆ WEB Logon

MF61 contains a HTTP server, thus MF61 can link and connect through Web Browser, and then conduct setting.

◆ Preparation

Before conducting MF61 setting, make sure the following：

- PC has connected to MF61, and PC and MF61 are situated in the same WAN with power supplied.
- If the default IP address (192.168.0.66) is occupied by else device, then it is a must to shut down that device first till the setting is over, and then allocate new IP address to MF61.

◆ How to search MF61

1、After installation of MF61 and network cable is completed, use MF61 's SEMAC Search to search all MF61 in a certain LAN, or download SEMAC Search utility from CHIYU homepage **www.chiyu-t.com.tw**. Desktop icon as below:

SEMACSearch.exe

2、Click SEMAC Searsh Picture icon, will display a window, as shown:
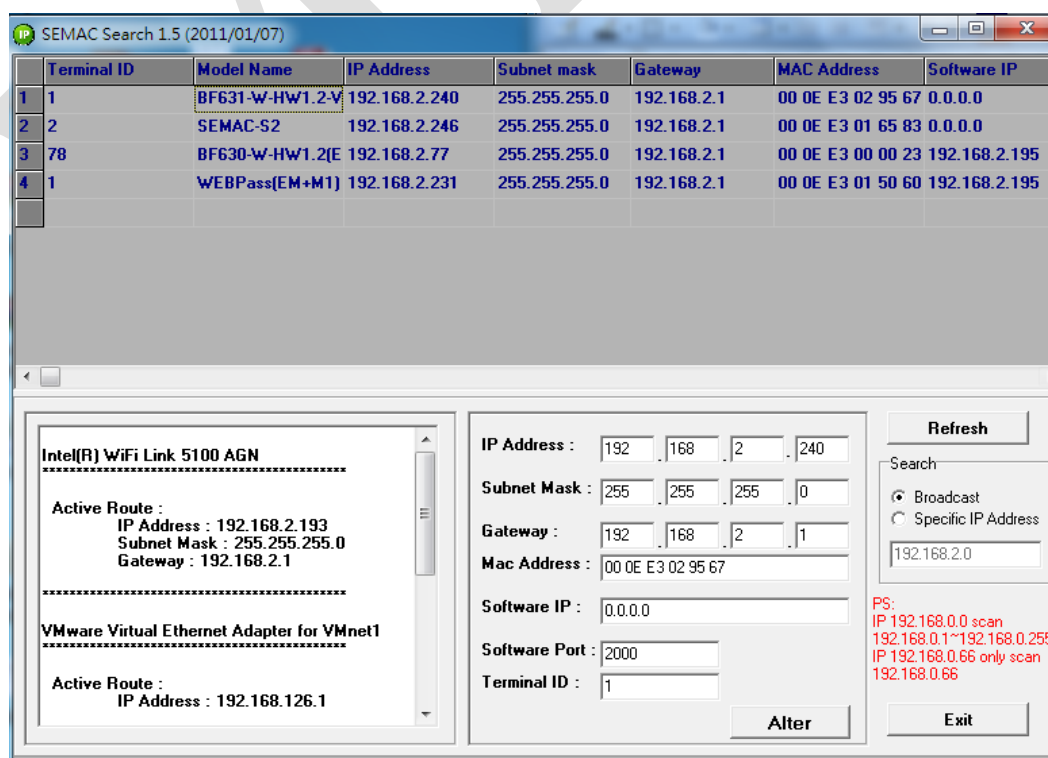

3、While the SEMACSearch window shows up, it will display all MF61 in LAN, and show its Terminal ID, Model Name, IP Address, Subnet Mark, Gateway, Mac Address, Software IP. Select particular MF61, then its related information will appear below the window, as shown:

4、The showed information of MF61 can be revised directly in the window, the part can be modified: IP Address, Subnet Mask, Gateway, Software IP, Software Port, Terminal ID. After modification completed (MAC Address can not modify),click **Alter** then it will display the modified information, as shown:

5、After modification, if want to confirm whether the modification is correct or not, click
Refresh button to refresh and check information (Fig-1), click Exit button to leave.(Fig-2)
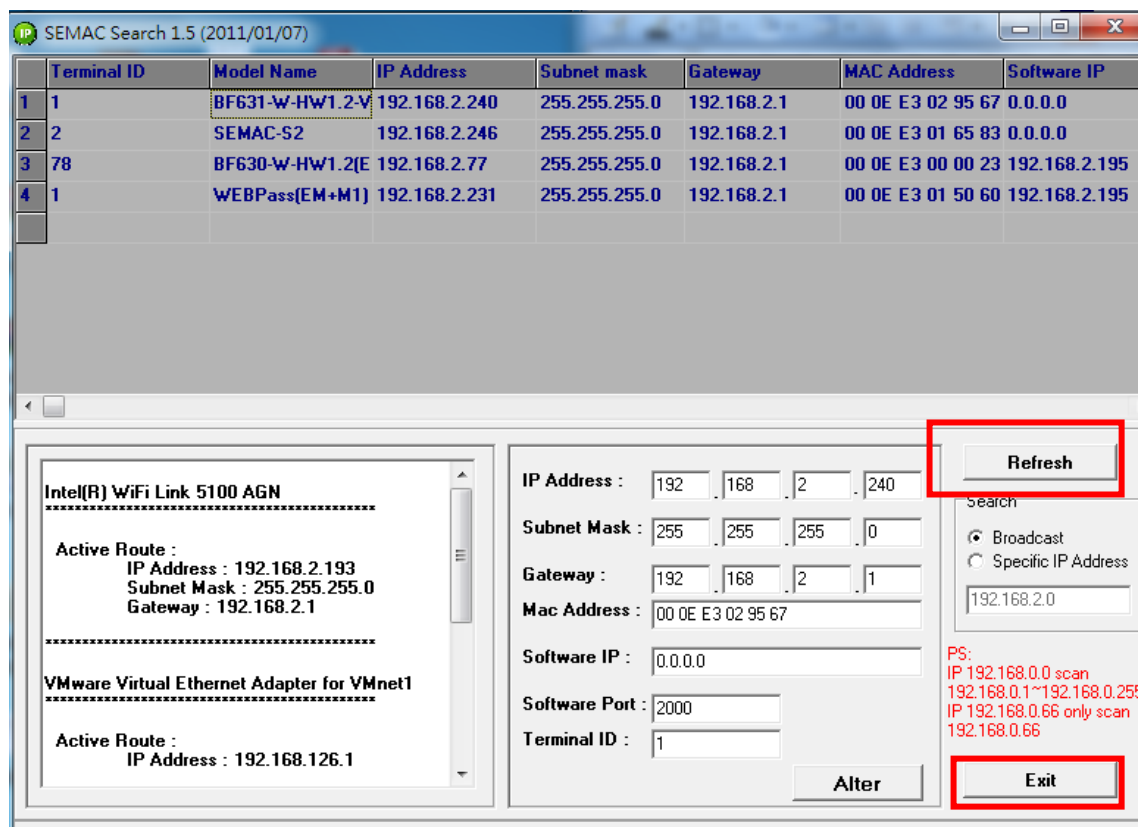

6、After modification, the IP address of MF61 has matched with its WAN, if want to get access
into the Web of MF61 , has two methods:
(1) Open SEMAC Searsh, select and double click particular MF61, then to enter its
webpage.
(2) While the internet explorer opened, input MF61 IP address to enter its webpage

WINDOWS XP：
《Step 1》
Click WINDOWS XP my computer My Computer , Open Control Panel Control Panel
on the left side, please turn to traditional overview and select network link
《Step 2》
Click LAN, then select content, the link configuration will be shown, click Internet
Protocol (TCP/IP) as left figure, then input the same setting as MF61, as right figure：
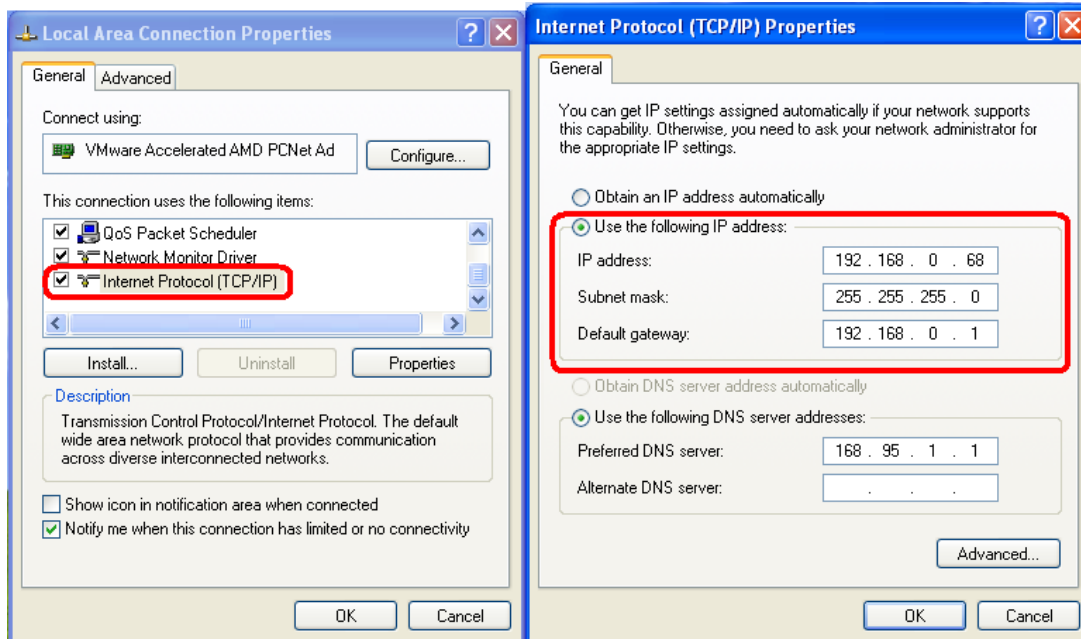

WINDOWS 7：

《Step 1》

Click Windows 7 icon, select Control Panel , open and search for, Network and Sharing Center click Alter Interface Card on the upper-left side.

《Step 2》

Click LAN link, select content, then the LAN settings will be shown, click Internet Protocol(TCP/IPv4), as left figure, click and input same setting as MF61, as right figure.
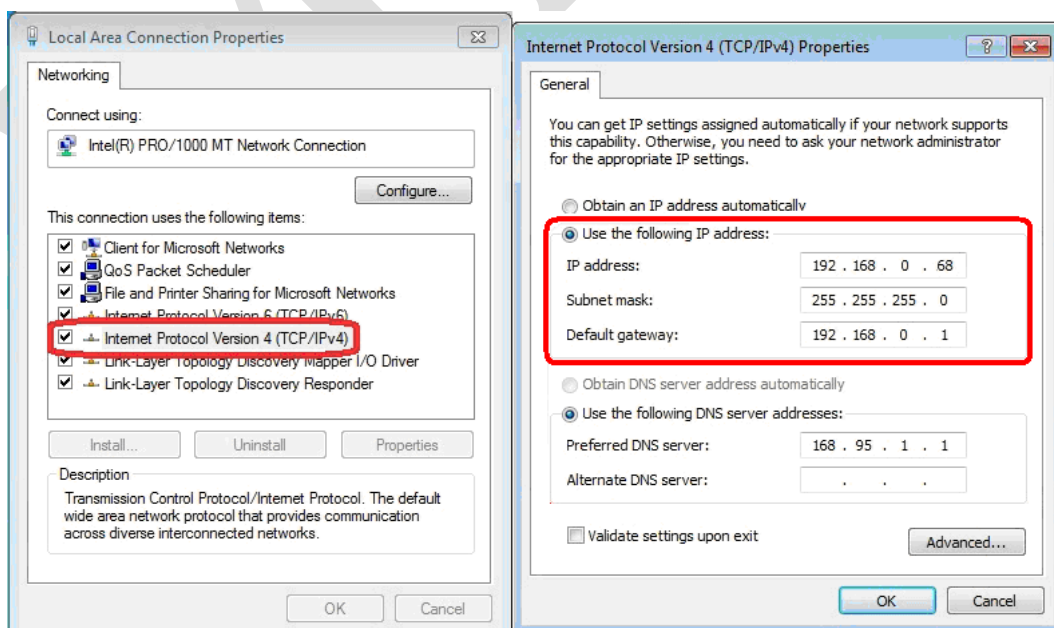

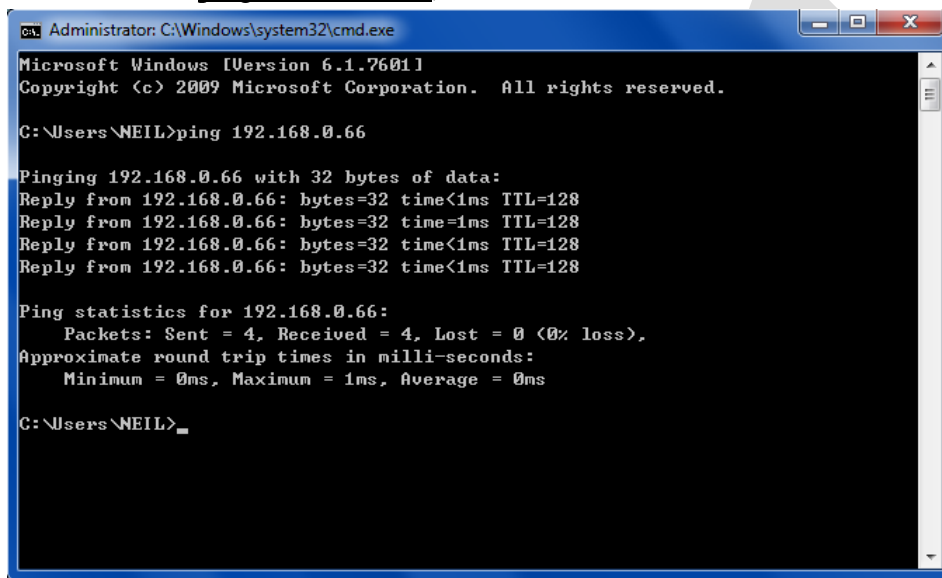

◆ **How to login to MF61 Web via web Browser**

1、Start Web browser (ig: WIN 7 IE), input MF61 's IP Address, for example: use the default MF61 IP Address: http://192.168.0.66

2、If connection failed, double check:

- If MF61 installed and its power supplied properly

- To examine the LAN connection, operate PC function with "Start →Run→input "cmd" instructoin to open MS-DOS commend mode, then test MF61 connection, input command: ping 192.168.0.66, as shown below:

- If no message responded, it explains the connection has trouble or PC's IP address is not match with MF61 's IP address

- Set the PC's IP address with MF61 's IP address with same segment, if the PC uses fixed IP address, the address must be ranged in: 192.168.0.1 ~ 192.168.0.65 or   192.168.0.67 ~ 192.168.0.254 , thus it can be compatible with MF61 's default IP address: 192.168.0.66, the " Subnet Mask's setting must be: 255.255.255.0

3、If the connection with MF61 is successful, then it will display a message window for User name and Password, the default for user name and Password is: admin/admin, as shown below:

4、While the user name and password entered, a Web setting interface of MF61 will be showed, enter it will then display a " Quick Setup " page.

➢ Main Windows (Terminal Status)

When installation has completed and connected with MF61, a "Main window" as below：

User Administration
- Access Log
- Auto Refresh Log
- View User List
- Add User

Terminal
- Terminal Status
- Terminal Setup
- Password Setup
- System Log
- Clock Setup

Access Control
- Time Set
- Time Zone Setup
- Group List
- Holiday Setup
- Door Setup
- Remote Control
- Event Handle
- Multi Badge Group

Tools
- IP Camera
- Backup
- Restore
- Reboot
- Upgrade Firmware
- Reset

BF631-W Web Ver1.0
Build Date 01/30/2013

TERMINAL STATUS

Product Name :	BF631-W(EM)(20000)
Serial No. :	029567(153321)
Firmware Version :	1.01.02,Jan 30 2013(HW1.1)
System Time :	06/04/2013 10:42:28
Terminal ID(MAC Address) :	1(00:0e:e3:02:95:67)
IP Address :	192.168.2.247
Subnet mask :	255.255.255.0
Default Gateway :	192.168.2.1
Primary DNS :	168.95.1.1
Listen Port/Software IP(status) :	2000 / 0.0.0.0 (Offline)
Web Management Port :	80
Registered User :	0
Available User Capacity :	20000
Registered FP :	0
Available FP number :	9590
Access/System Log Count :	0/6
Control Mode :	Controller(WG34)
Anti-Pass-Back(Tolerance Timer) :	Disabled(0)
Anti-Duress :	Disabled
Next BF631-W(Status) :	0.0.0.0(Offline)

◆ Illustration of Terminal Status

Browse the Function Menu Bar at the left side of the Main Window by IE Browser

►User Administration	
Access Log	1. Look up all access logs 2. Extract Access log and Event record reports with TXT and Excel format
Auto Refresh Log	Instant Access to records display
View User List	1. Display all user's information 2. Modify "User List", "Delete", "Inactivate" and "Activate" user data
Add User	1. Add single user account 2. Add batch user accounts
Fingerprint Synchronization	Setup a fingerprint synchronization method to be automatically or manually
►Terminal	
Terminal Status	Display Terminal Status: Terminal ID, Model name, Firmware version…etc (Main Windows)
Terminal Setup	1. Setup terminal principles like Terminal ID, Control Mode, Language display..etc (Terminal Setup" screen) 2. Terminal will be reboot after Terminal Setup has save
Password Setup	1. Setup Administrator / User/ Sub-User web logon ID and Password. 2. Setup Common Password 3. Terminal will be reboot after password has reset
System Log	1. Switch to the "System Log" 2. Extract System logs to be Text or Excel format
Clock Setup	1. Setup Network Time Server and Time Zone 2. Setup System Time
Auto Function Key Setup	Setup Function Key, Numeric Key, In/Out Time, up to 400 sets configurable
Function Key Setup	Setup Function Key, Numeric Key, Key definition, up to 400 sets configurable
►Access Control	
Time Set	Setup Time Set , up to 255 sets configurable
Time Zone Setup	Setup Time Zone. Each Time Zone could define from Monday to Sunday and Holiday. Up to 120 Time sets configurable
Group List	Setup Group information. Up to 255 groups configurable
Holiday Setup	Setup Holiday information. Up to 100 holidays configurable
Door Setup	Setup Door access policies like: Exit button time zone, Lock Release time zone, Anti Pass Back.

Remote Control	1. Display Door Status 2. Display Fire Alarm detection status 3. Remote Control door pulse open, pulse close, force open and force close. 4. Dismissed Event Alert 5. Activate or Inactivate Fire Alarm detection function
Event Handle	1. Setup Event handle types, latch times...etc 2. Setup Event Alert Email address
Multiple Badge	Setup Multiple Badge combination. Up to 10 sets configurable, 2~3 legal users include to each combination
Ring Time Setup	1. Setup Ring Time time set 2. Setup Ring tone lasting time 30 sets of Ring time can be configurable each day
►**Tools**	
IP Camera	1. Setup IP Camera IP address, types, ID and Password 2. Display captured image from IP Camera (latest picture)
Backup	Backup User list and Terminal information (User list is in TXT format only)
Restore	Backup User list and Terminal information (User list is in TXT format only)
Reboot	System reboot
Upgrade Firmware	Firmware Upgrade
Reset	1. Delete all data 2. System set to "Factory Default"
►**Button**	
Refresh	Refresh the WEB Status.
►**Home Mode**	
	Switch to "Home Mode" menu

➢ **User Administration**

◆ **Access Log**

Select "Access Log" on the Main Window, you'll see the "Access Log" screen as following picture:

Access Log

◆ Illustration of Access Log

►Access Records Illustration by Columns	
No.	Serial Number of Access Logs
User ID	User ID will be showed for the user who has access the door. By clicking "User ID" will direct current screen to "User Record "page to "Modify User Record" (picture 4). Should it be not connected, it means the information of the User ID has been deleted. * The figure in the parentheses( ) after the "User ID" means the user's level as 1~10.
User Name	A Name registered for the User to get IN/OUT. When the registered information without "Name", this column will be blank.
Date	A Date allowed for the User to get IN/OUT.
Time	A Time allowed for the User to get IN/OUT.
IN/OUT	IN: Access by WEBPASS OUT: Access by Wiegand Reader ※ APB level will be shown followed the IN/OU
Door No.	It stands for the Door Number Controlled By MF61
Note	Show up the relative IN/OUT records automatically as Anti-Duress, Fire Alarm......etc.
The First Page	Back to the 1st IN/OUT records page.
The Former 10 Pages	Forwarding 10 pages from the current IN/OUT records page.
1 2 3…N Page	Change to any IN/OUT records page assigned.
The Latter 10 Pages	Backwards 10 pages from the current IN/OUT records page.
The Last Page	Fly to the last IN/OUT records page directly.
►Query and Export	
Type	**1. User**：Check the user, can search the user records, and export the file out **2. Event**：Check the Event, can search the Event records, and export the file out
User ID or Card Number	**1. Single**：Can only query / export a single user's access to records or 5 records of the event within an event **2. All**：Can query / export all of the Access record or record of events
StartDate/End Date	Select the date by "Drop Down Menu".
User ID	Enter user ID to query Searchable/Export
Card No	Enter Card No to query Searchable/Export
Event	Click event Enter Event type query 5 maximum query event types.
►Button	
Search	Set the Search Requirement Click button to Search access records to demonstrate Requirement.
Export	Set the Export Requirement Click button to Export requirement TEXT or Excel file.

◆ Auto Refresh Log

Select "Auto Refresh Log" on the Main Window, there'll be "Auto Refresh Log" screen as the following picture:

◆ Illustration of Auto Refresh Log

►Auto Refresh Log	
No.	Serial Number.
User ID	Instant Display Access records User ID.
User Name	Instant Display Access records User Name.
Date	Instant Display Access records user enter/out date.
Time	Instant Display Access records user enter/out Time.
IN/OUT	Instant Display Access records user IN/OUT Log
Door	Instant Display Door
Note.	Show up the relative IN/OUT records automatically as Anti-Duress, Fire Alarm......etc.

◆ View User List

Select"View User List" on the Main Window, you'll see the "User List " screen as following picture:

◆ Illustration of User List

►Search User	
By "User ID"	Select "User ID" and enter "User ID" in the textbox to search.
By "Card No."	Select "Card No." and enter "Card No." in the textbox to search.
By "Employee ID"	Select "Employee ID" and enter "Employee ID" in the textbox to search
By "User Name"	Select "User Name." and enter "User Name" in the textbox to search.
Click button "GO"	Start to search.
Steps： 　　　1、Enter "User ID", "Card No." or "User Name" in the textbox 　　　2、Click button "GO" to search	
►User List	
No.	Serial Number.　Tick the box before the "Serial Number" and Click the button of "Activate" , "Deactivate" or "Delete" to manage the authorization of "Activate" , "Deactivate" or "Delete" for selected users, multi-selection is allowed.
User ID	Display User's ID. By clicking"User ID" to connect to "Modify User Record" page for modification
Employee ID	Display Employee ID
User Name	Display User Name
User Type	Types of the system users. Whenever the "User Type" is set up in the screen of "Modify User Record", this page will display Normal User (N), Super User(S), Visitor(V), Guard Touring(G)
Active	Display user's authorization status. Green light displays user's authority is activated, Grey light means user authority is inactived
F	When the user's Fingerprint registered, this column will be with Green Light.
P	When the user's Personal Password registered, this column will be with Green Light.
C	When the user's card registered, this column will be with Green Light.
Bypass Level	Display the user's Bypass time zone level from L1~L10.
The First Page	Back to the 1st page of "User List".
The Former10 pages	Forwarding 10 pages from the current "User List" page.
1 2 3…N page	Change to any "User List" page assigned.
The Latter 10 pages	Backwards 10 pages from the current "User List" page.
The Last Page	Fly to the last "User List" page directly.
►Button	
Activate	Activate the User's authorization.
Deactivate	Deactivate the User's authorization.
Delete	Delete the User's information registered.

◆ Modify User Record

Select "Modify User Record" on the Main Window, you'll see the " User Record" screen as following picture:

User Record
Add New User

REG :	⊙ Single ○ Continuous **Amount :** [ ]
User ID :	[ ]
Card No. :	[ ]
Employee ID :	[ ] (Max 10 chars.)
Name :	[ ] (Max 31 chars.)
Expire Date Check :	⊙ Disable ○ Enable
	From 2013 ⌄ (M) 05 ⌄ (D) 16 ⌄ (H) 6 (M) 49
	To 2013 ⌄ (M) 05 ⌄ (D) 16 ⌄ (H) 6 (M) 49
Status :	⊙ Activate ○ Deactivate
User Type :	Normal User ⌄
Group :	1. Free Time Group ⌄ 2. Disallowed Group ⌄ 3. Disallowed Group ⌄ 4. Disallowed Group ⌄
Bypass TZ Level :	LV1 ⌄
Personal Password :	[ ] (4 ~ 8 digits.)
Personal Confirm :	[ ]

Save

◆ **Illustration of Modify User Record**

►**User Record**	
User ID	User ID number can be create within 1~4294967295 or User ID couldn't be save if ID is exceeding the number
Card No	Input Card number by manually input or read by card decoder
Employee ID	Input Employee ID within 10 English characters or 3 words for Chinese
Name	User's Name, 10 characters at the most
Expire Date Check	Tick the box of "Enable" or "Disable" the user's expiry date control.
Effective From ~ To	When "Enable" the "Expire Date Check", you must enter the period of dates. The" Drop Down Menu" offers you the options of Year/Month/Date/Hour/Minute.
Status	Tick the box of "Activate" or "Deactivate" for user's authority
User Type	Card Types of the User. The "Drop Down Menu" will list all cards for **Normal User/ Super User/ Visitor/ Guard Touring.** The Respective definitions are as below : **Normal User:** General authority only **Super User Card :** Not constrained by APB (Anti Pass Back) policy **Visitor Card:** You may manage the visitors easily by setting the Visitor Card's Expiry Dates. **Guard Touring:** When the Guard Touring card senses the door, only the Logs will be kept but no door-open function.
Group	Each user can be assigned to 4 different groups. All the group names existed will be automatically listed out by the "Drop Down Menu "for your choice. "Free Time Group "is a "Default Group".
Bypass TZ Level	1. User's bypass time zone level is equal to Door setup's bypass time zone: User access door by the card 2. User's bypass time zone level is higher than door setup's bypass time zone: User access door by the card 3. User's bypass time zone is lower than door setup's bypass time zone: User should follow Door Setup bypass time zone access policy to access the door.
Personal Password	4~8 digits password combination is required. For command mode: User may use #UID#P# to input personal password
Personal Confirm	Reconfirm Personal Password
►**Button**	
Previous	Modify previous user record.
Save	Save the modified user record.
Delete	Delete existing user record.
Next	Modify next user record.

◆ Add User

Select "Add User" on the Main Window, you'll see the "User Record" screen as following picture：

User Record
Add New User

Default Gateway	For setting the Default Gateway of MF61.
DNS Server IP Address	For setting the DNS Server IP Address of MF61 . Default DNS Server IP Address is 168.95.1.1.
►Display Title	
Set up a string of word to be display on the MF61 LCD	
►Software Listen Port	
TCP Port(for Software)	For setting the TCP Port of the Software to communicate with MF61. Default TCP Port is 2000.
Software IP	For setting the Software IP to communicate with MF61. Default Software IP is 0.0.0.0.
►Web Language	
English	Select " English" as system language from the pull down menu, the WEB page of MF61 will be switched to "English" interface .
Chs	Select "Chs" as system language from the pull down menu, the WEB page of MF61 will be switched to "Simplified Chinese" interface .
Others	Select "Chs" as system language from the pull down menu, the WEB page of MF61 will be switched to "Traditional Chinese" interface.
►Anti Pass Back	
Enable	Tick this circle to enable the "APB"(Anti Pass Back) function.
Disable	Tick this circle to disable the "APB"(Anti Pass Back) function.
Tolerance Timer	Set up the restored time back to original setting after the "APB" triggered. The unit of time is "minute" and the max. Value is "65535". If the value is "0", then it will never be restored until you disable the "APB" by manual.
►Anti Duress	
Enable	Tick this circle to enable the "Anti Duress" function.
Disable	Tick this circle to disable the "Anti Duress" function.
Password	Set your password of "Anti Duress", default value = 9, max. 3 digits.
►WEB Management Port	
Http Port	Set your WEB port for MF61 , default value=80.
►Next MF61 (for APB only)	

	Set your IP address for Next MF61 but only available for the structure of multiple MF61 applications. Whenever this IP for next MF61 is set up, all the levels settings of original MF61 will be synchronized to next MF61
IP Address	
▶ **Fast-Registry mode**	
Active	Fast-Registry mode will be active when selecting Active Note: Disable Fast-Registry mode is necessary after new user card is registered
Inactive	Select Inactive to disable Fast-Registry mode
▶ **Voice indication mode**	
Active	Select Active to turn on voice indication mode when card is read
Inactive	Select Inactive to turn off voice indication mode when card is read
▶ **Fingerprint verification level**	
Default value is Auto Normal **(Note: Default value is recommended)**	
▶ **Illegal Fingerprint verification**	
Active	Keeps log(s) for illegal fingerprint(s)
Inactive	Keeps no log(s) for illegal fingerprint(s)
▶ **External Reader**	
IN	Access log direction will be indicating "IN" when select "IN" (Reader is installed at OUTSIDE of a door)
OUT	Access log direction will be indicating "OUT" when select "OUT" (Reader is installed at INSIDE of a door)
▶ **WIEGAND INPUT**	
34 Bits	Display card number with Wiegand 34 bit format (4 bytes). Custom format is acceptable
26 Bits	Display card number with Wiegand 26 bit format (3 bytes). Custom format is acceptable
1/10,000 ~ 3/100,000,000, Auto Secure	12 selectable fingerprint verification security levels *(Recommend NOT change from system default : Auto Normal)
Auto Normal	Default Fingerprint Verification Security Level (Recommend NOT change)
▶ **Connection with Software**	
Realtime (Client)	Establish Internet connection between software and terminal by using "Realtime (Client)" mode. Terminal (BF631W) is in passive operation mode. Custom modification is acceptable
Passive(Server)	Establish Internet connection between software and terminal by using "Passive (Server)" mode. Terminal (BF631W) is in active operation mode. Custom modification is acceptable
▶ **Double Clock In Control**	
Disable	Disable the function

	Not allow double clock in within a certain time.
Enable	When timer for double clock in time has enabled to be 10 seconds, then the clock in time between first time and second time should be 10 seconds.
	Note : 0 is not acceptable for double clock in
▶ **Card no. Display**	
Decimal	Display registry card number as Decimal format
Hexadecimal	Display registry card number as Hexadecimal
▶ **Card Format**	
Raw Data	Based on original card number (Serial number on the "Block 0")
Facility Code+ID	Display 10 numeric card format: First 5 numbers is for the factory facility code, and later 5 numbers is for the identification code
▶ **Function Key Trigger Mode**	
Manual FKey Mode	System will direct to latest action to the function key. For example: User A pressed F1 (eg. Break Out) and then User B is no needed to press F+1 (eg. for Break Out) until someone pressed other Function Key (eg. F+2 for Break In). For system has memorized the latest input parameter
Auto FKey Mode	System will automatically detect the definition setup on "IN/OUT Trigger Setup" and "Function Key Setup" **for Auto FKey Mode**
▶ **Button**	
Save	Save the Terminal Configuration Settings

◆ **Password Setup**

Select "Password Setup" from main menu for setup "WEB Logon Setting/Entrance Password ".
Referring to the following picture：

WEB Logon Setting

Administrator WEB Logon User Name :	admin	(47 Char. Max)
Administrator WEB Logon Password :	•••••	(35 Char. Max)
Operator WEB Logon User Name :	user	(47 Char. Max)
Operator WEB Logon Password :	••••	(35 Char. Max)
USER WEB Logon User Name :	user0	(47 Char. Max)
USER WEB Logon Password :	•••••	(35 Char. Max)

Save

Entrance Password

Common Password : 1234   (4 ~ 8 digits.)
Command Password : 111111

Save

◆ **Illustration of WEB Logon Setting/Entrance Password**

►WEB Logon Setting	
Administrator User Name	Input the required Administrator's logon user name for WEB management, max. 47 characters, default value: "admin".
Administrator Password	Input the required Administrator's logon password for WEB management, max. 35 digits, default value: "admin".
Operator User Name	Input the required Operator's logon user name for WEB management, max. 47 characters, default value: "user".
Operator Password	Input the required Operator's logon password for WEB management, max. 35 digits, default value: "user".
User's User Name	Input the required User's logon user name for WEB management, max. 47 characters, default value: "user0".
User Password	Input the required User's logon user name for WEB management, max. 35 digits, default value: "user0".
The Administrator, Operator and User have their respective authorizations, referring to the following "Authorization Table".	
►Entrance Password	
Common Password	Setup a common password for all users or keep it as blank to disable common password authority. Default value: "1234"
Command mode password	Using Command mode password to access MF61 terminal. Pressing 111111 (6 digits) → pressing "F1F1" to enter to main menu
►Button	
Save	Save the Password Setting.

※ Max. log capacity is 1536 entries for authorized person(s) checking only, no logs export provided.	

◆ **Clock Setup**

Select "Clock Setup" on the left side of the Main Window, you'll see the "System Clock Setup" screen, referring to the following picture:

System Clock Setup

Time Server :   ● Disable ○ Enable

[time.windows.com]   *Recommend: time.windows.com or time.nist.gov*

Time Zone :   [(GMT+08:00) China, Hong Kong, Australia Western ▼]

[Save]

New Date : [02/15/2011]   (mm/dd/yyyy)
New Time : [09:16:41]   (hh:mm:ss)

[Save]

◆ Illustration of System Clock Setup

►Time Server	
Disable	Tick this circle to shut up the Time Server network connection.
Enable	Tick this circle to start the Time Server network connection.
Time Zone	The "Drop Down Menu" offers you all the Time Zones available up to your option, default time zone : (GMT)England.
"SAVE" button	Save the Time Server Settings and adjust the time.
When enable the "Time Server", please key in the IP address or **http://** of the "Time Server". Then select the required Time Zone and Save it to connect the "Time Server" for a time adjustment.	
New Date	The date of networked PC computer. You may adjust the date to your requirement as the format of **"mm/dd/yyyy".**
New Time	The date of networked PC computer. You may adjust the time to your requirement as the format of **"hh:mm:ss"**.
SAVE (button)	Save the configuration of this page and upgrade the date/time for the networked PC computer.

◆ FKey Auto Trigger (Function Key)

Configure IN/OUT trigger setup to start the automatically Function Key service:

IN/OUT TRIGGER SETUP

Function Key	IN(HH:MM)	OUT(HH:MM)	

Function Key: None ∨ None: 0 ∨ 0 ∨ IN 0   H: 0   M --- OUT 0   H: 0   M [Add]

◆ Illustration of IN/OUT Trigger Setup

►Configure Time Set for IN/OUT Trigger Setup	
Function Key	Provide 4 sets of function keys F1～F4, select one from the pull down menu.
Numeric Key	Provide 0~9 numeric keys for extending function key sets up to 400 sets, selecting numbers from the pull down menu.
IN- - -OUT	IN: Input a start time / OUT: Input a finish time
Note: IN/OUT trigger time set preset for function key is important when performing IN/OUT records and displaying on MF61 LCD. When user is manually pressed the hardware function key, the IN /OUT indication will be displaying on the access record. When user is not pressed the function key during the preset time, then IN and OUT indication will be display the combination of the function key (when FKey presets with function key name then display with function key name, or nothing preset for the function key then IN/OUT records will be display with NONE)	
►Button	
Delete	Delete the preset time set
Set	Add new time set

◆ Function Key Setup

Function Key Setup window is as below:

Function keys

| Function Key | **Define** | | Function Key | Define | |

function key : None ∨ digital key : 0 ∨ 0 ∨ definition : [   ] (Max 15 Word)

must be selected function keys, numeric keys to success

set

◆ **Illustration for Function Key Setup**

►**Function Key Setup**	
Function key	Provide F1~F4 function key selection
Numeric key	Provide 0~9 function key selection
Definition	Input function key with name
►**Button**	
Delete	Delete preset function key
Set	Add new function key

Note : Maximum Function key combination can be 400 sets

➢ Access Control

◆ Time Set

Select and Click " Time Set " on the left side of the Main Window, you'll see the "Time Set" configuration screen, referring to the following picture:

Time Set

Time Set List :

| 000 | 00:00 ~ 00:00 | | 001 | 00:00 ~ 23:59 | |

Time Set : [002 ▽] From [00] H : [00] M To [23] H : [59] M [SET]

◆ Illustration of Time Set

►Time Set List	
Time Set List	It will display all the configured time set(s). 2 System Default Time sets are : 00:00~00:00 and 00:00~23:59
Time Set	Select a time set serial number for the time set from the pull down menu. Maximum Time Set can be. 255 sets. System built-in values are "000" and system default serial number for time set is "000" and "001"
From ~ To	Input a time set period, for example : 8:00am to 17:00pm as one period, then **Time Set** Time Set List : 000 00:00 ~ 00:00 | 001 00:00 ~ 23:59 002 08:00~17:00 | DELETE Time Set : [003 ▽] From [00] H : [00] M To [23] H : [59] M [SET]
►Button	
DELETE	Delete an existing "Time Set".
SET	Add a new "Time Set".

◆ Time Zone Setup

Select and Click "Time Zone Setup" on the left side of the Main Window, you'll see the "Time Zone List" screen referring to the following picture:

Time Zone List

Time Zone List :					
000	Deactivate		001	Any Time	

Time Zone ID : 002 ▼ [Set]

◆ Illustration of Time Zone List

►Time Zone List	
Time Zone List	Display all the Time Zone(s) existing. Click the Time Zone name(indicated as the Time Zone Name example) to enter its Time Zone Information Screen.
Time Zone ID	Select your Time Zone Serial Number from the "Drop Down Menu", system built-in numbers as "000" and "001", max. 120 Time Zones allowed.
Time Zone Name	Click the name of Time Zone (for example : 2, as below picture) to enter the "Time Zone Information" screen for modification.
►Button	
DELETE	Delete an existing Time Zone.
SET	Enter the Time Zone Information screen.

Here is an example of "Time Zone Information" screen to show how to set the daily door access and card punching authorized Time Set from Monday to Sunday and Holidays:

◆ Illustration of Time Zone Information

►Time Zone Information Setting	
Weekday (Day)	The "Drop Down Menu "offers you options from Monday to Sunday and Holiday. Steps : "SET" the "Time Set" on "Time Set" screen→ Select your weekday →Choose your time set(s) of the time zones.
Time 1 ~ Time16	Each day from Monday ~Sunday and Holiday is allowed 16 time sets. However, you have to make some Time Sets on the "Time Set" screen in advance for the options here, otherwise only 2 default system Time sets can be chosen, referring to the following illustration:
►Button	
Save	Save the" Time Zone Information".
Cancel	Cancel or Modify the "Time Zone Information".
When the " Time Zone Setup " completed, please click the "Time Zone Name "to enter to "Time Zone Information" screen.	

◆ Group List

Select and Click "Group List " on the left side of the Main Window, you'll see the   "Group List " screen referring to the following picture:

Group List

Group List :					
000	Disallowed Group		001	Free Time Group	

Group ID : 002 ▾ Set

◆ Illustration of Group List

►Group List	
Group List	Display all the Groups configured. Click the Group's name to enter its "Group Information "
Group ID	Select your "Group ID" by serial number, default values : 000、001. The "Drop Down Menu "offers you all the serial number of Group ID as options, max. 255 groups allowed.
►Button	
Delete	Delete a Group ID.
Set	Enter the "Group Information" screen.

Below Group Information screen is to configure door(s) with a specific time zone ID, referring to the following picture:

Group Information

Allowed Door :   Time Zone ID :
☑ 1.   001 Activate ▾

Save   Cancel

◆ Illustration of Group Information

►Allowed Door	
Door	Tick the box of Door (number) means a certain group users have authorized to access the door during the preset time, otherwise it is prohibited.
Tim Zone ID	Display preset time zone information from the pull down menu
►Button	
Save	Save the "Group Information".
Cancel	Cancel or Modify the "Group Information"

◆ Holiday Setup

Select and Click "Holiday Setup" on the left side of the Main Window, you'll see the "Holiday setup" screen referring to the following picture:

Holiday setup

01 ▼ Month / 01 ▼ Date [SET]

Holiday List :
-

◆ Illustration of Holiday Setup

►Holiday Setup	
Month	Select a month from the "Drop Down Menu".
Date	Select a date from the "Drop Down Menu".
►Button	
Set	Add a new Holiday.
Delete	Delete a Holiday.

◆ Door Setup

Select and Click "Door Setup" on the left side of the Main Window, you'll see the "Door Setting" screen as below:

◆ Illustration of Door Setting

►Door Setting	
(L9) First Admin FP (IN) Time Zone	Set up door's bypass time zone as L9 (Default: Deactivate). Verification of first entry to the door must be using Administrator's fingerprint. After admin fingerprint has been verified, all users may access the door by user's card or fingerprint or password. ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
(L8) Multiple FP Time Zone	Set up door's bypass time zone as L8 (Default: Deactivate). Before set up L8 time zone to a door, it should be firstly composed a multiple badge work sheet at Multi Badge Group configuration menu. L8 bypass time zone provides maximum 10 multiple FP time zone groups, and each group may consist of 2~3 registered users. No verification order is limited. ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
(L7) Multiple Badge Time Zone	Set up door's bypass time zone as L7 (Default: Deactivate). Before set up L7 time zone to a door, it should be firstly composed a multiple badge work sheet at Multi Badge Group configuration menu. L7 bypass time zone provides maximum 10 multiple badge time zone groups, and each group may consist of 2~3 registered users. No verification order is limited. ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
(L6) Card + FP + Personal Password Time Zone	Set up bypass time zone for the door as L6 mentioned (Default: Deactivate). User may access the door by Card + Fingerprint + Password without verification order. To assure user has properly verified according to L6 bypass time zone requested, MF61 hardware LCD will be displaying which verification item is needed. (Suggest users follow the LCD instruction) ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.

(L5) FP + Personal Password Time Zone	Set up bypass time zone for the door as L5 mentioned (Default: Deactivate). User may access the door by Fingerprint + Password without verification order ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
(L4) Card + Personal Password or Card + FP Time Zone	Set up a bypass time zone for the door as L4 mentioned (Default: Deactivate). User may access the door by Card+ Password or Card+ Fingerprint without verification order. MF61 LCD will indicate users to press * to start verification for 1:1 or input personal password. ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
(L3) Personal Password or FP Time Zone	Set up a bypass time zone for the door as L3 mentioned (Default: Deactivate). User may access the door by input personal password (command by #UID#P#), or verify fingerprint. ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
(L2) Card Only Time Zone	Set up a bypass time zone for the door as L2 mentioned (Default: Deactivate). User may access the door by user's card. ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
(L1) Card or Password or FP Time Zone	Set up a bypass time zone for the door as L1 mentioned (Default: Anytime). User may access the door by user's card or fingerprint or personal password (#UID#P#) or common password. ※ When door's bypass time zone level is set to lower or equal to user's bypass level then user may access the door by user's card or fingerprint or password.
Lock Release Time Zone	Set up a Lock Release time zone at the door (Default: Deactivate). All users may access the door without verification. When **First Card** is selected as Needed, then the Lock Release Time Zone will only be activated after scan by a legal card.
Exit Button TZ	Set up an Exit Button time zone at the door. Supporting only **OUT** direction. (Default: Any Time).
Anti Pass Back Level	Set up an Anti Pass Back Level at both "**IN**" and "**OUT**" direction of a Door. APB level is allowed to be configured within 0~255.
Lock Delay Time	Set up the "Lock Release Time" , default as 10 seconds.

Door Open Delay Time	Set up "Door Open Delay Time" , default as 10 seconds.
Access Log	Ignore or Record the access logs
Door Sensor Mode	Set up door sensor mode to be N/A or Normal Open/Close. Default is N/A. When Normal Open/Close is selected, door status will display door sensor circuit Short or Open.
Door Relay Energized	There are 3 options for activating Door Lock relay after verification is done: None：No trigger door lock relay 1 Relay：Trigger door lock relay from MF61 2 Relay：Trigger door lock relay from MF61 and also trigger other relays. For BF-20 and BF-50 status: 1 Relay：Without BF-20/BF-50 installed, trigger another relay on MF61 2 Relay：With BF-20/BF-50 installed, trigger relay 2 only ※ Check up for Hard alarm & Soft alarm on Event Handle should not be overlapping.
►Button	
Set BF-50 Card	Input 50 sets of card numbers to BF-50. When main controller is disconnected to BF-50, BF-50 will check the card number with the input card number list to open the door.
Update BF-50 Card	Input card number to BF-50 then tap the update button to update card numbers to BF-50

◆ Set BF-50 Card

To secure door will be opened when any disconnections happened to current system, MF61 provides alternative mechanism to open the door by presetting 50 sets legal cards into BF-50 relay box. Select" Door Setup" on the Main Window, then click "Set BF-50 Card" button as below:

BF50 CARD

No.	Card No.	No.	Card No.	No.	Card No.	No.	Card No.	No.	Card No.

◆ Illustration of Event Handle

►Event Type	
Unregistered User	1. It will be listed in the "Drop Down Menu". When it's selected and the user unregistered, one unregistered record will be shown on the " Access Log "screen (referring to the sample as below); if the event level equal to or higher than the "Alarm Trigger Level", the Relay will be triggered and the E-mail will alert when " E-mail Alerts "is configured and one alert e-mail will be sent out. 2. When the "Latched Time : 0", the alert can only be lifted/stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0, referring to the below picture :
Deactivated User	1. It will be listed in the "Drop Down Menu". When it's selected and the user card has been deactivated then a Deactivated status will be recorded to Access Log screen. If Event Handle level is equaled to or higher than the "Alarm Trigger Level", the Relay will be triggered then sent and alert E-mail to the account which has been configured. 2. When the "Latched Time : 0", the alert can only be lifted/stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0.
Not Allowed Door	1. It will be listed in the "Drop Down Menu". When it's selected and the user's "Group" setting is different than the Door's group settings, then a"Disallowed door" message will be recorded on the "Access Log "screen; if the event handle level is equaled to or higher than the"Alarm Trigger Level", the Relay will be triggered and an E-mail will be sent out if any email account has been configured. 2. When the "Latched Time : 0", the alert can only be stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0.
Time Zone Violation	1. It will be listed in the "Drop Down Menu. When it's selected and the user's Time Zone Group setting is different from the Door Group Time Zone settings, one Open Time Error message will be recorded on the Access Log "screen; If the event handle level is equaled to or higher than the" Alarm Trigger Level", the Relay will be triggered and an E-mail will be sent out to the account which has been configured 2. When the "Latched Time : 0", the alert can only be stopped by clicking Alarm OFF button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0.

Expired User	1. It will be listed in the "Drop Down Menu". When it's selected and the user's "Expiry Date" overdue one "EXPIRED "message will be recorded on the Access Log "screen. If the event handle level is equaled to or higher than the" Alarm Trigger Level, the relay will be triggered and an E-mail will sent to an email account which has been pre-configured. 2. When the "Latched Time : 0", the alert can only be stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0.
Anti Pass Back Violation	1. It will be listed in the "Drop Down Menu". When it's selected and the doors with "Anti Pass Back Level "configuration, one "Anti_PB Rej "message will be recorded on the Access Log "screen. If the event handle level is equaled to or higher than the" Alarm Trigger Level", the Relay will be triggered and an alert E-mail will be alert to an account which has been pre-configured. 2. When the "Latched Time : 0", the alert can only be stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0. * Only 1 Door (2 way) is supported
Door open too long	1. It will be listed in the "Drop Down Menu". When it's selected and the door closes over the time set after the user's card flashed, one "Open too long "message will be recorded on the Access Log "screen. If the event handle level is equaled to or higher than the" Alarm Trigger Level", the Relay will be triggered and an alert E-mail will be alert to an account which has been pre-configured. 2. When the "Latched Time : 0", the alert can only be lifted/stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0.
Tamper Switch Breakdown	1. It will be listed in the "Drop Down Menu". When it's selected and the device is opened forcibly, one "CASE OPENED"message will be shown on the Access Log "screen. if the event level equals to or higher than the" Alarm Trigger Level", the Relay will be triggered and the E-mail will alert when " E-mail Alerts "is configured and one alert e-mail will be sent out. 2. When the "Latched Time : 0", the alert can only be stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 0.
Door Intruded	1. It will be listed in the "Drop Down Menu". When it's selected and the door is accessed forcibly and abnormally, one " DOOR INTRUDED " message will be shown on the Access Log "screen ; if the event level equals to or higher than the" Alarm Trigger Level", the Relay will be triggered and the E-mail will alert when " E-mail Alerts "is configured and one alert e-mail will be sent out. 2. When the "Latched Time : 0", the alert can only be stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 4.

Duress Alarm On	1. It will be listed in the "Drop Down Menu". When it's selected and the "Duress Alarm "of a door is triggered by the user (note : you have to key in the "Anti Duress Password" then press "ENT "before flashing users card) then an "ANTI DURESS" message will be shown on the Access Log "screen; if the event level equals to or higher than the" Alarm Trigger Level", the Relay will be triggered and the E-mail will alert when " E-mail Alerts "is configured and one alert e-mail will be sent out. 2. When the "Latched Time : 0", the alert can only be stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 4.
Fire Alarm On	1. It will be listed in the "Drop Down Menu". When it's selected and if the "Fire Alarm "is triggered, one "FIRE ALARM" message will be shown on the Access Log "screen; if the event level equals to or higher than the" Alarm Trigger Level", the Relay will be triggered and the E-mail will alert when " E-mail Alerts "is configured and one alert e-mail will be sent out. 2. When the "Latched Time : 0", the alert can only be stopped by clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function, default level = 5.
Latched Time	The "Latched Time" can be set up to 65535 seconds. When the "Latched Time : 0", means the latched status will never be restored until the alert be stopped by manually clicking " Alarm OFF "button on the "Door Status Monitoring/Security Bypass" screen of "Remote Control" function.
Event Handle Types	
Hard Alarm	Preset one or many event type(s) to trigger MF61 I/O relays
Soft Alarm 1	Preset one or many event type(s) to trigger BF50 Relay No.2
Soft Alarm 2	Preset one or many event type(s) to trigger BF50 Relay No.3
IP Camera	Preset one or many event type(s) to trigger IP Camera to take snap shot
E-Mail Alarm	Preset one or many event type(s) to trigger email alarm sends to certain email recipients
►Event Handle - E-mail Alerts	
Location	Enter the equipment name or location for alarming.
SMTP Mail Server	Enter the Mail Server address of sending Alarm E-mail.
Mail from	Enter the name of sender
SMTP Server Requires Authentication	Set mail server User id and Password
Mail to:	Enter the major receiver email address for the alarm message.
Mail CC to:	Enter the carbon copy receiver email address for the alarm message
"Set"(button)	Save the configured information.

◆ Multi-Badge Group

Select Multi-badge group to enter to configuration screen as below:

Multi Badge Group

Multi Badge Group	User ID 1	User ID 2	User ID 3
1.			
2.			
3.			
4.			
5.			
6.			
7.			
8.			
9.			
10.			
SET			

◆ Illustration of Multi-Badge Group

►Multi-Badge Group	
Multi-Badge Group	Total 10 Multi-Badge Group can be set for MF61 system, each group may consist of 2~3 legal users
User ID 1	Input the User ID for Multi-badge group
User ID 2	Input the User ID for Multi-badge group
User ID 3	Input the User ID for Multi-badge group
SET (button)	Save the User ID data and Multi-Badge group

※ Multi-Badge function is related to Door Setup menu, by selecting L7 : Multi-Badge Time Zone with Double or Triple badges.

◆ Set Ring Time

Click Set Ring Time from menu to enter to Ring Setup configuration screen:

＊ Ring setup is using Relay no. 2. is the same with Event Handle alarm, hence only one option (Ring or Event handle) can be using on Relay no. 2

RING SETUP

◆ **Illustration for Ring Time Setup**

►**Ring Setup**	
Time no.	Input a ring time as format HH：MM
Ring Open Time	Input a ring open time (1~255sec, Default is 10 sec)
►**Button**	
DELETE	Delete preset ring time
SET	Save ring time

➢ Tools

◆ IP Camera

Select "IP Camera" from menu to enter to IP Camera configuration screen:

◆ Illustration IP Camera

► IP Camera	
IP Camera	Enter IP address of the IP Camera
PORT	Enter a port number for connecting the IP Camera, default is 80
Type	Select an IP Camera model name from the inbuilt name list. Default is VIVOTEK IP7133/7330
ID	Enter IP Camera Logon ID
Password	Enter IP Camera Password
Door	Display Picture entrances and exits latest sensor
Set	Save all the configurations.
Refresh	Refresh the WEB page

◆ Backup

Select" Backup" from the menu to enter to Backup system screen:

Backup

Tips :
This command will export the User Registry data for backup purpose.

◉ Database(database.cfg) ○ User List(userlist.txt)

BACKUP

◆ Illustration of Backup

►Backup	
Database (database.cfg)	Backup Project for : Terminal Setup, Password Setup, Time Set, Time Zone Setup Group List, Holiday Setup, Door Setup.
User List (userlist.txt)	Backup Project for: User ID, Card No, Name, User Type, Group.

◆ Restore

Select" Restore" from the menu to enter Restore/Import configuration screen as below:

◆ Illustration of Restore

►Restore	
Database (database.cfg)	Restore Project for: Terminal Setup, Password Setup, Time Set, Time Zone Setup Group List, Holiday Setup, Dorr Setup.
User List (userlist.txt)	Restore Project for: User ID, Card No, Name, User Type, Group.

◆ Reboot

Select "Reboot" from the menu to enter to "Reboot System" screen as below:

Reboot System

[REBOOT]

◆ Illustration of Reboot

►Button	
Reboot	Reboot the MF61 , similar to warm start a computer

◆ Upgrade Firmware

Select "Upgrade Firmware" from the menu to enter to "Firmware Upgrade" screen as below:

FIRMWAVE UPGRADE

Warning: Upgrade must NOT be interrupted

Please select a file to upgrade : [   ] [Browse...]   [UPGRADE]

◆ Illustration of Upgrade Firmware

►Steps
Press "BROWSE" button to search Firmware file for upgrade
Press "Upgrade" button to execute firmware upgrade.
►Note
Upgrade the "System Code" first then upgrade "WEB Code"., power input should be sustain when process with firmware upgrade

◆ Reset

Select **"Reset"** from the menu to enter to **"Reset"** screen as below:

Reset All

☐ User Data	☐ Access Logs	☐ Group	☐ Time Zone	☐ Time Set	☐ Holiday	☐ System Logs
☐ Fkey Auto Trigger	☐ Func. Key	☐ Ring Time				

SELECT ALL | Delete

Reset System to Factory Default - Factory Default

◆ Illustration of Reset

► Data Reset	
User Data	Tick the box before "User Data" and Click "Delete" to delete all the User Data.
Access Log	Tick the box before "Access Log" and Click "Delete" to delete all the Access Logs.
Group	Tick the box before "Group" and Click "Delete" to delete all the Group.
Time Zone	Tick the box before "Time Zone" and Click "Delete" to delete all the Time Zone.
Time Set	Tick the box before "Time Set" and Click "Delete" to delete all the Time Set.
Holiday	Tick the box before "Holiday" and Click "Delete" to delete all the Holiday
System Logs	Tick the box before "System Logs" and Click "Delete" to delete all the System Logs
FKey Auto Trigger	Tick the box before "System Logs" and Click Delete" to delete all the FKey Auto Trigger setting
Func. Key	Tick the box before "System Logs" and Click "Delete" to delete all the Func. Key setting
Ring Time	Tick the box before "System Logs" and Click "Delete" to delete all the Ring Time setting
► Button	
Select All	Tick the box to select all boxes in a time
Delete	Delete ticked item(s)
Steps： 　　1、Tick the item(s) to be deleted. 　　2、Click button "Delete".	
► Reset System to Factory Default	
Factory Default	Execute command to restore the system to the factory default (Default IP will be 192.168.0.66, and the Web logon name and password will be "admin"

➢ Home Mode

Click Home Mode button from the menu to enter to Home mode main screen:
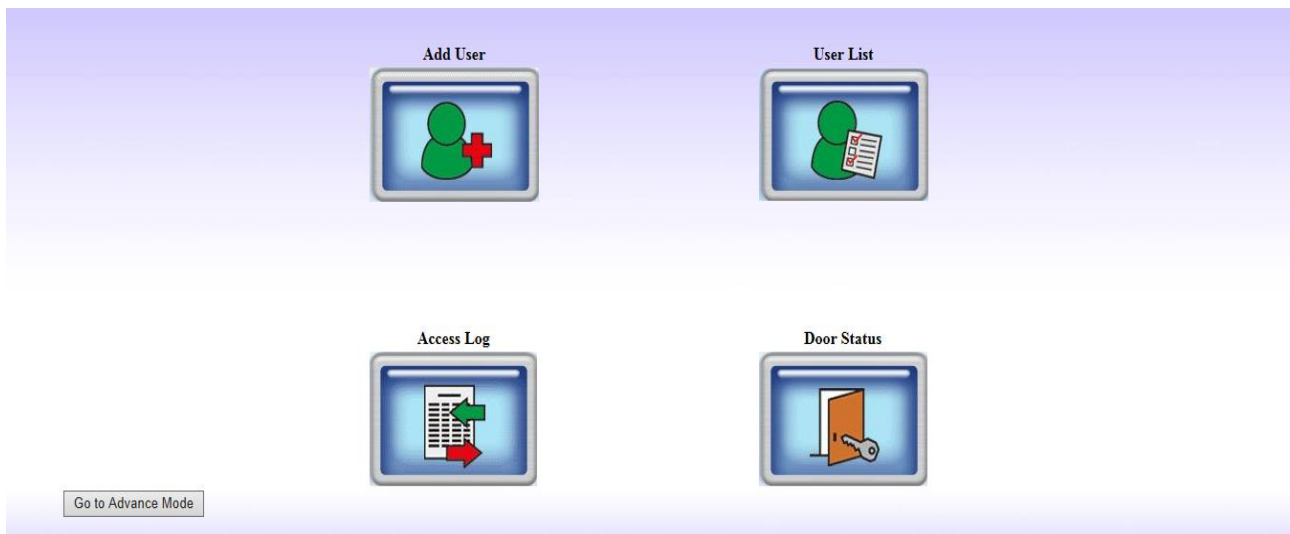

➢ Home Mode menu description

Home Mode menu operation will benefit to users to access MF61 web server with simple view. Current provide four home mode service sections: Add User, User List, Access log, Door Status:

◆ Home mode: User Record - Add New User

Press Home Mode Add User button to enter to home mode User Record-Add new user configuration screen as follow:

►Add User	
Reg. (Registry)	**Select Single user registry or Continuous user registry. Account amount is needed when Continuous is selected.**
User ID.	**User ID can be input number from 1 to 20,000 (User ID number exceeding 20,001+ will be invalid)**
Card No.	**User card number can be registry to system by manually input or by card reader**
Employee ID	**Input employee ID for the user**
Name	**User name length can only be 10 characters**
Status	**Tap "Active" or "Inactive" authority for user**
Personal Password	**Input personal password by 4~8 digits**
Password confirm	**Confirm to personal password**
Save	**Save the information**
Home Mode Top Page	**Switch to Home Mode menu**

User Record
Add New User

REG : ⦿ Single ◯ Continuous   Amount : [   ]

User ID : [   ]

Card No. : [   ]

Employee ID : [   ] (Max 10 chars.)

Status : ⦿ Activate ◯ Deactivate

Personal Password : [   ] (4 ~ 8 digits.)

Personal Confirm : [   ]

[Save] [Home Mode Top Page]

◆ Home Mode: User List

►User List	
No.	User list serial number for users in the system (1~20,000 digits only)
User ID	Display with User ID and when tap the ID will be redirecting to User profile screen for further modifying.
User name	User name for the system users, each user name can be in 10 characters length only
User Type	Display user(s) type(s) of current system
Active	Display a certain system user status is in "Activate" or "Deactivate"
Activate (button)	Press to activate user(s) access authority to current system
Deactivate (button)	Press to deactivate user(s) access authority to current system
Delete (button)	Press to delete information from User List
Home Mode Top Page(button)	Press to switch to Home Mode main menu

User List

No.	User ID	User Name	User Type	Active
		No Registered User		

[Activate] [Deactivate] [Delete] [Home Mode Top Page] Activate, Deactivate or Delete SELECTED Employee

◆ Home Mode: Access Log

►Access Log	
No.	Access Log(s) serial number(s)
User ID	User ID for IN or OUT of certain door. Tap the User ID will redirect to user profile screen for modification. If redirection failed means the User ID has been deleted. ※ User type will be indicated within a bracket symbol after User ID **4 User types for system :** **Normal user (N)、Super user (S)、Visitor (V)、Guard Touring (G)**
Name	User name for IN or Out for certain door. User name may be empty if user name has not input to user profile.
Date	IN/OUT record date
Time	IN/OUT record time
IN/OUT	IN：Door opened by MF61 (controller/sub-controller) OUT：Door opened by MF61 (reader)or Wiegand reader ※ APB level will be indicated within a bracket symbol (N) after IN/OUT sign
Function Keys	Display Function key setting information
Door	Indicating door number for the access log
Home Mode Top Page	Switch to Home Mode menu

Access Log

◆ Home Mode: Door Status Monitoring and Security Bypass

Door Status	
▶Door Status Monitoring	
Door Status	Display with updated door status. LED light off when a door's no response. Green = Door's normal closed, Yellow=Door's opened, Red=Exception (circuit short, circuit open, intrude and door open too long)
BF-50 Status	Display with **BF-50 status.** **X means no BF-50 is in the connection** **V means BF-50 is in used**
Fire Alarm Detection	Display with fire alarm detection is ON or OFF status
▶Security Bypass	
State	Display with current Security Bypass status when: Pulse Open door, or Force Close, or Back to Normal, or Force Open.
Pulse Open Door	Tap the **Pulse Open** button to remotely open the door. Door status will be turned to Pulse Open. Door will be unlocked.
Force Close	Tap the **Force Close** button can remotely close the door, Door status will be turned to Force Close,
Back to Normal	Tap the **Back to Normal** will revive door security status to be normal
Force Open	Tap the **Force Open** button can remotely open door in normal status. Door status will be turned to Force Open. Door will be unlocked.
Home Mode Top Page	Switch to Home Mode menu

➢ **Appendix Ⅰ**

Event name	Event status	How to revive
Door open delay	Door open time over the default time (with door sensor)	Close the door
Door closed	Door closed after "Door open delay" event triggered.	N/A
Pulse Open	Pulse open door from remote site	Tap"Back to Normal" button to turn to normal
Pulse Close	Pulse close door from remote site	Tap "Back to Normal"button to turn to normal
Back to Normal	Door status back to normal	N/A
Identification failure	User identification failed	Check access method for user is to conform to door's policy
Unregistry	Card is not registered	Register the card
Inactive	User authority and data invalid	Active user's authorization
APB violation	APB policy violated when APB function is activated	Check APB level
Not Allowed	User Group is not allowed to access a certain door	Check setting of user Group
Door intruded	Door intruded illegally	Check door sensor funcationality
Tamper switch breakdown	Tamper switch is being triggered	Check tamper switch on the terminal status
Push Button	Open door by push button	N/A
Normal Close	Door closed after door opened	N/A
Anti-Duress	Anti-Duress event triggered. (User requires to input Anti-duress password then scan card)	N/A

Fire Alarm	Fire alarm triggered	Check fire alarm signal is being triggered. Release the fire alarm signal.
Security defense	Security On(Based on software)	Apply software or scan security type card to release the security status
Security off	Security off (Based on software)	N/A
Tamper switch close	Tamper switch closed after tamper switch breakdown	N/A
Illegal time zone	Access door with card out of time zone	Check time zone for door
Lock release time zone start	Unlock time zone start	Check lock release time zone. Change the time zone to be none to release the status
Lock release time zone end	Unlock time zone end	N/A
Warm start	Tap Reboot to warm start terminal (power on status), system display with Warm start message	N/A
Cold start	Power on after power breakdown. System log displays "System power on".	N/A
Backup battery	Backup battery is being used when power off	Check power status
Normal power on	Power on after power breakdown (with backup battery)	N/A
BF50 on line	BF-50 On line	N/A
BF50 off line	BF-50 Off line	Check RS485 or BF50 status
Door sensor circuit short	Door sensor circuit short	Check door sensor circuit
Door sensor circuit open	Door sensor circuit open	Check door sensor circuit

Interlock violation	Access second door before first door closed.	Check first door has been normally closed
Emergency open	Tap Emergency open button remotely	Tap All door then click Back to normal
Emergency close	Tap Emergency close button remotely	Tap all door then click Back to normal
Fire alarm detection on	Fire alarm detection is activated from remote site	N/A
Fire alarm detection off	Fire alarm detection off from remote site	N/A
Force open	Tap Force open button from remote site	N/A
Manually alarm release	Alarm relay is triggered when a certain event tolerance time set to "0". Alarm relay will be off when Alarm off is selected.	N/A
Auto alarm off	Event trigger tolerance time set to other than"0", alarm relay will be triggered.	N/A
IP Conflict	IP confliction over two terminals	Modify IP for one terminal
