

VISITORS MANAGEMENT SYSTEM

CATALOGUE

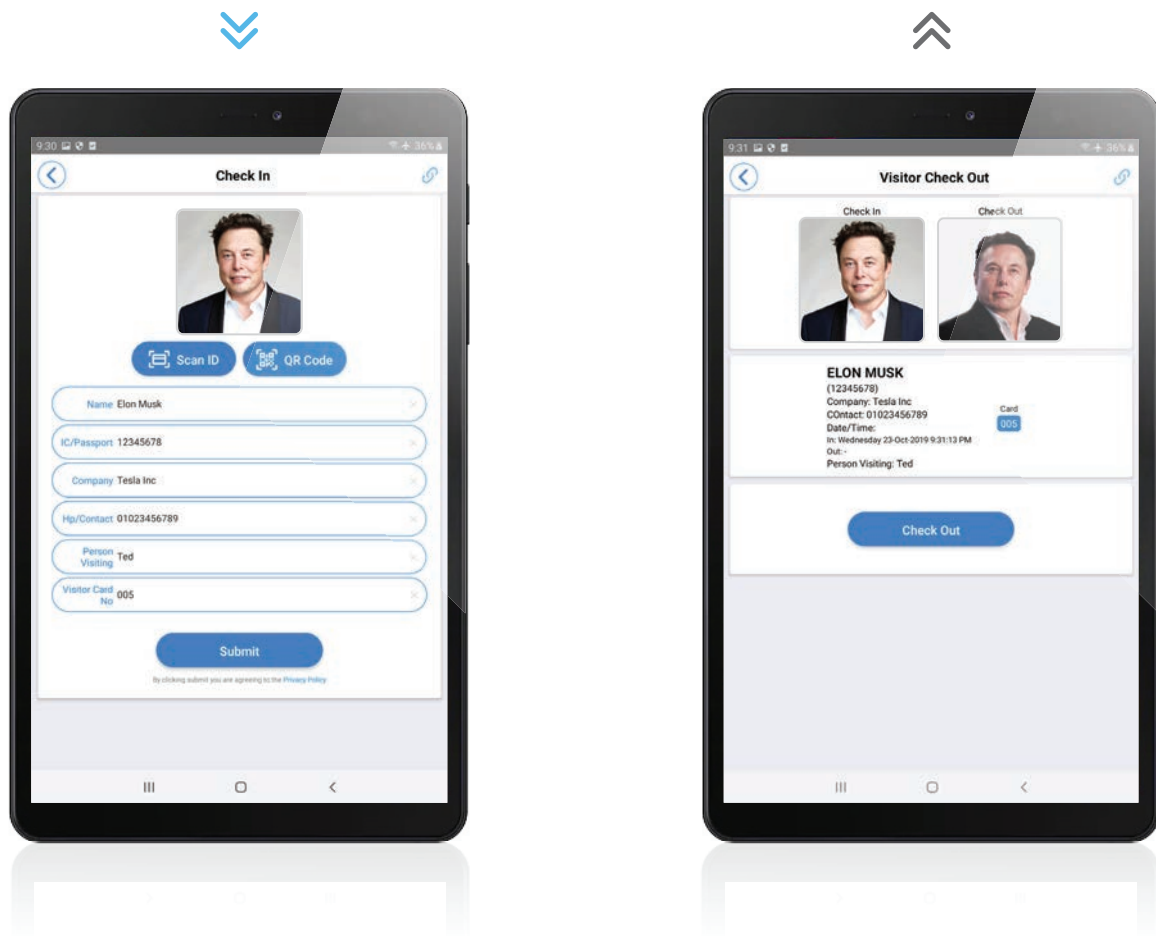

HOW IT WORKS

Each entry/exit point is equipped with a tablet that is used to enter visitors' information and/or scan their IDs with OCR (Optical Character Recognition Technology) using the tablet's built-in camera (no additional equipment is required).

Visitor is allow to use their IC, new driving license or passport to completes the check-in process.

Upon checkout, another picture is taken for the visitor, to make sure it matches the check-in picture.

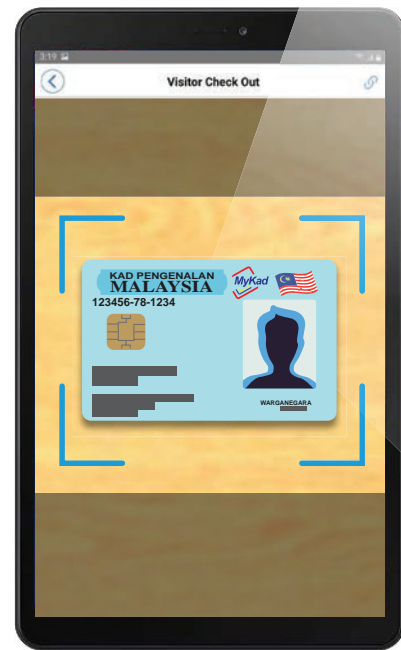

The admin Dashboard displays LIVE the checked visitors and the security personnel currently on duty.

Features:

Speed up the information entry process by using OCR scanning technology (NRIC, Driving license and passport) using the built in tablet camera.

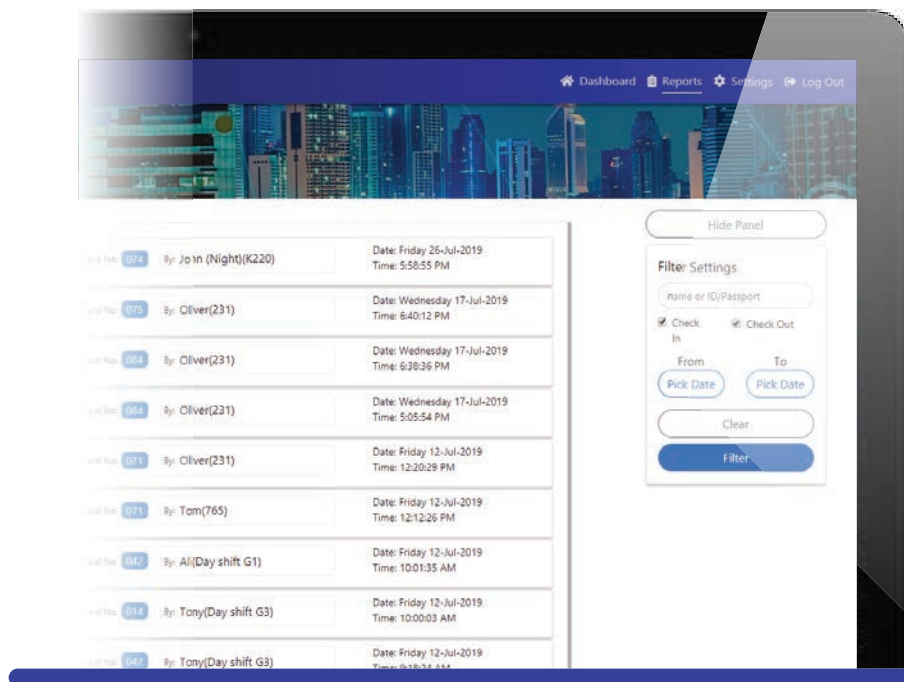

(No additional hardware is required!)

Pre-register visitors and generate check-in QR Code.

Features:

Filter and generate reports as you need with a few click.
