## MX60-D2 WEB Configuration

### ◆ Logon WEB

MX60-D2 is with built-in HTTP server for using WEB IE Browser to connect MX60-D2 and execute the settings of MX60-D2.

### ◆ Premise

Please make sure the following points before your MX60-D2 settings:

- Your PC computer may build up a physical connection with MX60-D2, meanwhile, both of your computer and the MX60-D2 are within the same Network Segment.
- MX60-D2 has been installed and with power.
- Should the default IP address of MX60-D2 ( 192.168.0.66 ) has been occupied by other devices, you have to shut down all the other devices until the setting completed. Then a new IP address will be distributed to the MX60-D2.

### ◆ WEB IE Browser

- 1 · Start the WEB IE Browser first.
- 2 · Enter the <http://> and the IP address of MX60-D2 in the address bar. For example, enter the default IP address of MX60-D2: <http://192.168.0.66>.

#### **Communication failure:**

When no feedback from the MX60-D2, please check as below:

- Is the MX60-D2 installed properly, the local area network (LAN) connected well or the power connected fine? Try to use the “ping” command to test the communication status of MX60-D2 IP address by the following steps:
  - Open a MS-DOS window, or a command window;
  - Input your command: ping 192.168.0.66,  
For example : C:\user\tank>ping 192.168.0.66If no any response, it indicated abnormal connection or the PC computer IP address in conflict or not match with MX60-D2 IP address ( referring to next paragraph ) .
- If a PC computer with a Static IP/Fixed IP, the IP range should be defined between 192.168.0.1~ 192.168.0.65 or 192.168.0.67~192.168.0.254. So the PC computer IP may be compatible with the default IP address of MX60-D2, 192.168.0.66. Moreover, the Subnet Mask should be as 255.255.255.0 ◦
- To make sure both your PC computer and the MX60-D2 in the same Network Segment.

## ➤ Main Window (Terminal Status)

When installation completed and well connected with MX60-D2, the “Terminal Status” window will be pop-up. It will show after the following connection frequently as following illustration:

### TERMINAL STATUS

<b>Product Name :</b>	SEMAC-D2(20000)
<b>Serial No. :</b>	038fe1(122022)
<b>Firmware Version :</b>	1.00.00,Dec 23 2013(HW1.1)
<b>System Time :</b>	02/11/2014 15:31:41
<b>Terminal ID(MAC Address) :</b>	1(00:0e:e3:03:8f:e1)
<b>IP Address :</b>	192.168.2.55
<b>Subnet mask :</b>	255.255.255.0
<b>Default Gateway :</b>	192.168.2.1
<b>Primary DNS :</b>	168.95.1.1
<b>Listen Port/Software IP(status) :</b>	2000/0.0.0.0(Offline)
<b>Web Management Port :</b>	80
<b>Registered User :</b>	0
<b>Available User Capacity :</b>	20000
<b>Access/System Log Count :</b>	0/10
<b>Reader Type :</b>	WG34
<b>Anti-Pass-Back(Tolerance Timer) :</b>	Disabled(0)
<b>Anti-Duress :</b>	Disabled
<b>Next SEMAC(status) :</b>	0.0.0.0(Offline)

## ◆ Illustration of Terminal Status Screen

Browse the Function Bar left side :

► User Administration	
<b>Log/Report</b>	Switch to the “Access Log” screen to check, search, export log reports
<b>Auto Refresh Log</b>	Press the button to refresh system to get new logs
<b>View User List</b>	Switch to the “User List” screen to Search/Modify/Delete/Deactivate/Activate user data
<b>Add User</b>	Switch to the “User Record” screen and input user data on the”Add New User ”screen
► Terminal	
<b>Terminal Status</b>	Switch to the “Terminal Status” screen ( Main Window)
<b>Terminal Setup</b>	Switch to the “Terminal Configuration” screen to input data
<b>Password Setup</b>	Switch to the “WEB Logon Setting” and “Entrance Password” screen.
<b>System Log</b>	Switch to the “System Log” screen.
<b>Clock Setup</b>	Switch to the “System Clock Setup” screen.
► Access Control	
<b>Time Set</b>	Switch to the “Time Set” screen.
<b>Time Zone Setup</b>	Switch to the “Time Zone List” screen.
<b>Group List</b>	Switch to the “Group List” screen.
<b>Holiday Setup</b>	Switch to the “Holiday Setup” screen.
<b>Door Setup</b>	Switch to the “Door Setting” screen.
<b>Remote Control</b>	Switch to the “Door Status Monitoring” and “Security Bypass” screen.
<b>Event Handle</b>	Switch to the “Event Handle” screen.
<b>Multi Badge Group</b>	Switch to the “Multi Badge Group” screen.
► Tools	
<b>IP Camera</b>	Switch to the “IP Camera Configuration“ screen.
<b>Backup</b>	Switch to Backup screen
<b>Restore</b>	Switch to Restore screen
<b>Reboot</b>	Switch to the “Reboot System“ screen.
<b>Upgrade Firmware</b>	Switch to the “Firmware Upgrade“ screen.
<b>Reset</b>	Switch to the “Reset“ screen.
► Button	
<b>Refresh</b>	Refresh the WEB Status.

## ➤ User Administration

### ◆ Log/Report

Select "Access Control" on the Main Window, you'll see the "Access Log/Query and Export" screen as the following picture:

#### Access Log/Query and Export

No.	User ID	User Name	Date	Time	IN/OUT	Door	Note.
-----	---------	-----------	------	------	--------	------	-------

No Log Data

#### Query and Export

<b>Type</b>	<b>Selection</b>	<b>Start Date</b>	<b>End Date</b>
<input checked="" type="radio"/> user <input type="radio"/> event	<input checked="" type="radio"/> Single <input type="radio"/> All	<input type="text" value="2014/02/06"/>	<input type="text" value="2014/02/06"/>
<b>User ID</b>	<b>Card No.(DEC)</b>		
<input type="text"/>	<input type="text"/>		
<b>Export Type</b>			
<input checked="" type="radio"/> Txt <input type="radio"/> Xls	<input type="button" value="Search"/>	<input type="button" value="Export"/>	

## ◆ Illustration of Access Log

▶ Query (BY)	
<b>Type</b>	By User or Event
<b>Selection</b>	Single or All
<b>Start / End Date</b>	From – To Date period input
<b>User ID</b>	Input User ID or Card No. (in Decimal format)
<b>Export Type</b>	Text (txt) or Excel (xls) format
▶ Access Records Illustration by Columns	
<b>No.</b>	Serial Number
<b>User ID</b>	A system User ID assigned for the user to access door(s). Click the “User ID” to enter the page of “User Record” and “Modify User Record”. ※ The figure in the parentheses ( ) after the “User ID” is indicated the user’s Bypass TZ level as 1~10
<b>User Name</b>	User name has registered to the current system
<b>Date</b>	A date period allowed user(s) to access door(s)
<b>Time</b>	A Time allowed for the User to get IN/OUT.
<b>IN/OUT</b>	<p><b>2 Door/2 Way:</b></p> <p>IN : Open the door (1~2) by punching card at the outside of door reader to get IN records</p> <p>OUT : Open the door (1~2) by pressing push button inside of a door to get OUT records</p> <p>※ The figure in the parentheses ( ) after the “IN/OUT” record indicated APB (Anti Pass Back) level.</p>
<b>Door No.</b>	Indicating the Door Number controlled by MX60-D2.
<b>Note</b>	Show up the relative IN/OUT records automatically as Anti-Duress, Fire Alarm.....etc.
<b>the First Page</b>	Back to the 1st IN/OUT records page.
<b>the Former10 pages</b>	Forwarding 10 pages from the current IN/OUT records page.
<b>1 2 3...N page</b>	Change to any IN/OUT records page assigned.
<b>the Latter 10 pages</b>	Backwards 10 pages from the current IN/OUT records page.
<b>the Last Page</b>	Fly to the last IN/OUT records page directly.

## ◆ Auto Refresh Log

Auto Refresh Log Wed Feb 05 2014 17:52:31 GMT+0800 (台北標準時間)

No.	User ID	User Name	Date	Time	IN/OUT Door	Note.
-----	---------	-----------	------	------	-------------	-------

## ◆ View User List

Select "View User List" on the Main Window, you'll see the "User List" screen as the following picture:

### User List

Search User :   By User ID  By Card No.(DEC)  By User Name

\*Reg Type: F(Fingerprint) , P(Password) , C(Card)

No.	User ID	User Name	User Type	Active	F	P	C	Bypass Level
<input type="checkbox"/> 1.	<a href="#">115</a>	Katherine	Normal	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	1

Total 1 User(s) << End of List... >>

**Activate, Deactivate or Delete SELECTED Employee**

## ◆ Illustration of User List

▶ Search User By	
<b>By “User ID”</b>	Select “User ID”and Enter your “User ID”in the textbox to search.
<b>By “Card No.”(DEC)</b>	Select “Card No.”and Enter your“Card No.”in the textbox to search.
<b>By “User Name”</b>	Select “User Name.”and Enter your“User Name”in the textbox to search.
<b>Click “GO” Button</b>	Start to search.
<b>Steps :</b>	
1、Enter your “User ID”, “Card No.” or “User Name” in the “blank textbox” 2、Click button “GO” to search.	
▶ User List	
<b>No.</b>	Serial Number. Tick the box before the “Serial Number” and Click the button of “Activate”, “Deactivate” or “Delete” to manage the authorization of “Activate”, “Deactivate” or “Delete” for selected users, multi-selection is allowed.
<b>User ID</b>	User’s ID. Click the “User ID” to enter the “Modify User Record” page.
<b>User Name</b>	Display User Name in the system.
<b>User Type</b>	Types of the User. Whenever the “User Type” is set up in the screen of “Modify User Record”, this page will display Normal User, Super User, Visitor, Guard Touring and Defense Card according to the setup.
<b>Active</b>	Display the user’s authorization status. Green Light indicated the user’s door access authority is being activated, otherwise it is not activated.
<b>P</b>	When the user’s Personal Password registered, this column will be with Green Light.
<b>C</b>	When the user’s card registered, this column will be with Green Light.
<b>Bypass Level</b>	Display the user’s Time Zone level of Bypass from L1~L10.
<b>the First Page</b>	Back to the 1st page of “User List”.
<b>the Former10 pages</b>	Forwarding 10 pages from the current “User List” page.
<b>1 2 3...N page</b>	Change to any “User List” page assigned.
<b>the Latter 10 pages</b>	Backwards 10 pages from the current “User List” page.
<b>the Last Page</b>	Fly to the last “User List” page directly.
▶ Button	
<b>Activate</b>	Activate the User’s authorization.
<b>Deactivate</b>	Deactivate the User’s authorization.
<b>Delete</b>	Delete the User’s information registered.

## ◆ Modify User Record

Select "Modify User Record" on the Main Window, you'll see the " User Record" screen as following picture:

### User Record Modify User Record

---

User ID :	<input type="text" value="115"/>	(1 ~ 20000 )
Card No. :	<input type="text" value="1010151110"/>	(DEC)
Name :	<input type="text" value="Katherine"/>	(Max 31 chars.)
Expire Date Check :	<input checked="" type="radio"/> Disable <input type="radio"/> Enable	
From	<input type="text" value="2014"/> (Y) <input type="text" value="02"/> (M) <input type="text" value="05"/> (D) <input type="text" value="17"/> (H) <input type="text" value="59"/> (M)	
To	<input type="text" value="2014"/> (Y) <input type="text" value="02"/> (M) <input type="text" value="05"/> (D) <input type="text" value="17"/> (H) <input type="text" value="59"/> (M)	
Status :	<input checked="" type="radio"/> Activate <input type="radio"/> Deactivate

Group :	1. <input type="text" value="Free Time Group"/> 2. <input type="text" value="Disallowed Group"/> 3. <input type="text" value="Disallowed Group"/> 4. <input type="text" value="Disallowed Group"/>	
Bypass TZ Level :	<input type="text" value="L1"/>	
Personal Password :	<input type="text"/> (4 ~ 8 digits.)	
Personal Confirm :	<input type="text"/>	

---

## ◆ Modify User List in “View User List”

► User Record	
<b>User ID</b>	Self-define User ID from number 1~20,000 is allowed only.
<b>Card No.</b>	Manual input card no. in decimal format (when any card decoder installed, card no. can be read automatically)
<b>Name</b>	Input User’s Name ( max. 31 characters)
<b>Expire Date Check</b>	Enable or Disable user’s authority expire date check
<b>Effective From ~To</b>	When “Expire Date Check” enabled. It requires to enter a period of date time.
<b>Status</b>	“Activate” or “Deactivate” user access authority for system
<b>User Type</b>	<p>Card Types of the User. The “Drop Down Menu” will list out cards for <b>Normal User , Super User, Visitor, Guard Touring, Defense Card , Manager Card-Add and Manager-Card-Delete</b> as your choice. The Respective definitions are as below :</p> <p><b>Normal User:</b> System default type for common users.</p> <p><b>Super User Card:</b> Not constrained by APB (Anti Pass Back) rule.</p> <p><b>Visitor Card:</b> Program visitor cards with certain date access permission (expired date check)</p> <p><b>Guard Touring Card:</b> Door won’t open when Guard Touring card punched but log will be kept on system.</p> <p><b>Defense Card:</b> When the card sweeps the door, all the doors will activate Access Control at once. Any type of cards cannot access the door until the Defense Card punch again to restore normal functions.</p> <p><b>Manager Add-Card:</b> Card will be added when Add-Card scanned</p> <p><b>Manager Delete-Card:</b> Card will be deleted when Delete-Card scanned</p>
<b>Group</b>	Each user can be assigned to 4 different groups. All of the group names existed will be automatically listed out by the “Drop Down Menu” for your choice. “Free Time Group” is a “Default Group”.
<b>Bypass TZ Level</b>	The “Bypass Time Zone Level” of each user is from L1~L10. When user’s Bypass TZ level >Door Bypass TZ Level, User may access door by card only. When user’s Bypass TZ level < Door’s Bypass TZ level, user should access the door by door’s setup bypass level.
<b>Personal Password</b>	4~8 digits allow only
<b>Personal Confirm</b>	Reconfirm Personal Password.
► Button	
<b>Previous</b>	Modify previous user record.
<b>Save</b>	Save the modified user record.
<b>Delete</b>	Delete existing user record.
<b>Next</b>	Modify next user record.

## ◆ Add User

Select "Add User" on the Main Window, you'll see the User Record " screen for Add New User as the following picture:

---

### Add New User

---

REG :  Single  Continuous    Amount :

User ID :  (1 ~ 20000 )

Card No. :  (DEC)

Name :  (Max 31 chars.)

Expire Date Check :  Disable  Enable

From  2014  (Y)  02  (M)  06  (D)  15  (H)  0  (M)

To  2014  (Y)  02  (M)  06  (D)  15  (H)  0  (M)

Status :  Activate  Deactivate

User Type :  Normal User

Group : 1.  Free Time Group  2.  Disallowed Group  3.  Disallowed Group  4.  Disallowed Group

Bypass TZ Level :  L1

Personal Password :  (4 ~ 8 digits.)

Personal Confirm :

---

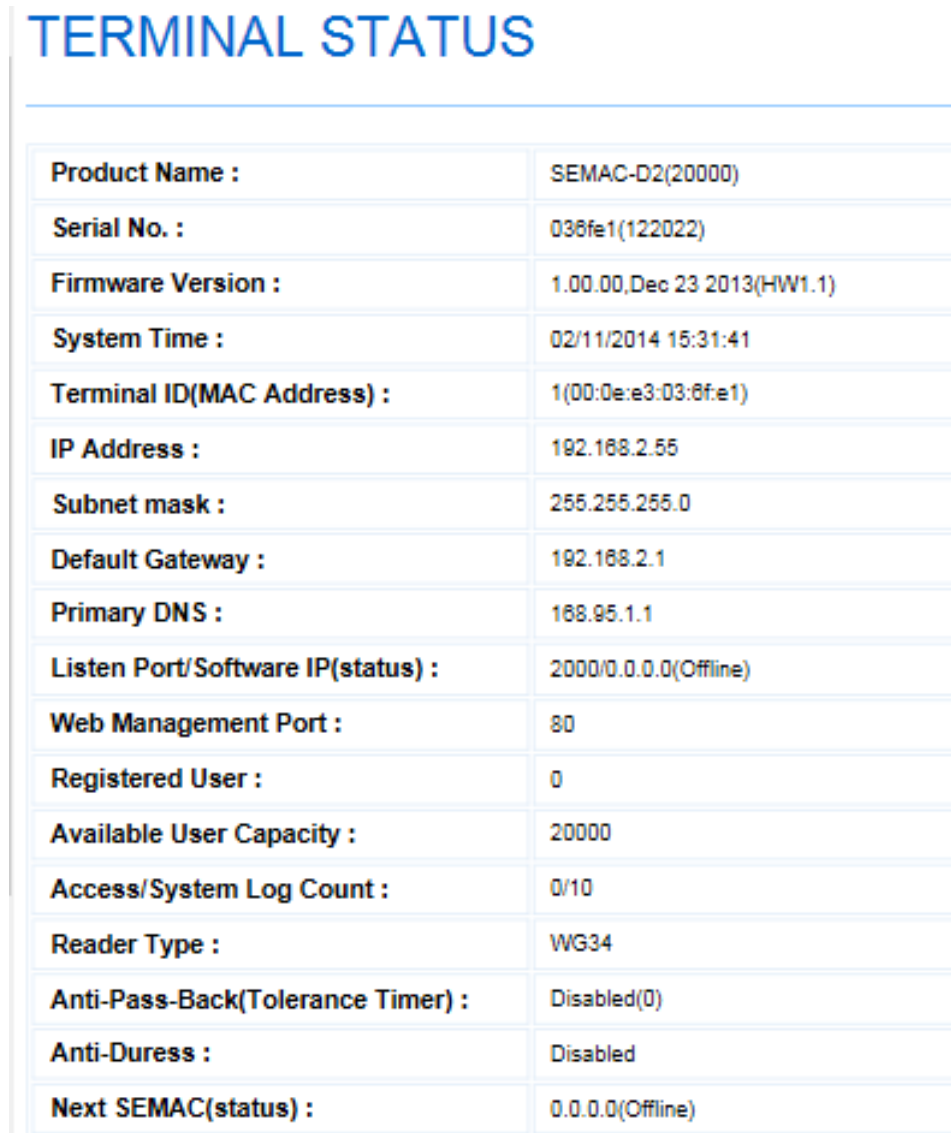

## ◆ Illustration of Add New User

► User Record	
<b>REG</b>	Single: Only one user can be registered each time. Continuous: It allows you to register 1~20000 users continually. You may input required q'ty in the textbox of Amount. However, only the serial number is accepted and supported.
<b>User ID</b>	Self-define User ID from number 1~20,000 is allowed only.
<b>Card No.</b>	Manual input card no. in decimal format (when any card decoder installed, card no. can be read automatically)
<b>Name</b>	Input User's Name ( max. 31 characters)
<b>Expire Date Check</b>	Enable or Disable user's authority expire date check
<b>Effective From ~To</b>	When "Expire Date Check" enabled. It requires to enter a period of date time.
<b>Status</b>	"Activate" or "Deactivate" user access authority for system
<b>User Type</b>	Card Types of the User. The "Drop Down Menu" will list out cards for <b>Normal User , Super User, Visitor, Guard Touring, Defense Card , Manager Card-Add and Manager-Card-Delete</b> as your choice. The Respective definitions are as below : <b>Normal User:</b> System default type for common users. <b>Super User Card:</b> Not constrained by APB (Anti Pass Back) rule. <b>Visitor Card:</b> Program visitor cards with certain date access permission (expired date check) <b>Guard Touring Card:</b> Door won't open when Guard Touring card punched but log will be kept on system. <b>Defense Card:</b> When the card sweeps the door, all the doors will activate Access Control at once. Any type of cards cannot access the door until the <b>Defense Card</b> punch again to restore normal functions. <b>Manager Add-Card:</b> Card will be added when Add-Card scanned <b>Manager Delete-Card:</b> Card will be deleted when Delete-Card scanned
<b>Group</b>	Each user can be assigned to 4 different groups. All of the group names existed will be automatically listed out by the "Drop Down Menu" for your choice. "Free Time Group" is a "Default Group".
<b>Bypass TZ Level</b>	The "Bypass Time Zone Level" of each user is from L1~L10. When user's Bypass TZ level > Door Bypass TZ Level, User may access door by card only. When user's Bypass TZ level < Door's Bypass TZ level, user should access the door by door's setup bypass level.
<b>Personal Password</b>	4~8 digits allow only
<b>Personal Confirm</b>	Reconfirm Personal Password.
► Button	
<b>Save</b>	Save user records.

## ➤ Terminal

### ◆ Terminal Status

Select and Click "Terminal Status" on the left side of the Main Window, you'll see the "Terminal Status" screen. This screen is the Main Window for Logon. It displays the current Terminal Status and relative information of WEB setup, referring to the following picture:

TERMINAL STATUS	
Product Name :	SEMAC-D2(20000)
Serial No. :	038fe1(122022)
Firmware Version :	1.00.00,Dec 23 2013(HW1.1)
System Time :	02/11/2014 15:31:41
Terminal ID(MAC Address) :	1(00:0e:e3:03:8f:e1)
IP Address :	192.168.2.55
Subnet mask :	255.255.255.0
Default Gateway :	192.168.2.1
Primary DNS :	168.95.1.1
Listen Port/Software IP(status) :	2000/0.0.0.0(Offline)
Web Management Port :	80
Registered User :	0
Available User Capacity :	20000
Access/System Log Count :	0/10
Reader Type :	WG34
Anti-Pass-Back(Tolerance Timer) :	Disabled(0)
Anti-Duress :	Disabled
Next SEMAC(status) :	0.0.0.0(Offline)

## ◆ Illustration of Terminal Status

▶ Terminal Status	
<b>Product Name</b>	Model Number of MX60-D2
<b>Serial No.</b>	Serial Number of MX60-D2
<b>Firmware Version</b>	Firmware and Hardware Version of MX60-D2
<b>System Time</b>	System Time of MX60-D2
<b>Terminal ID (MAC Address)</b>	Terminal ID and MAC address of MX60-D2
<b>IP Address</b>	Current IP address of SECMAC-D2
<b>Subnet mask</b>	Subnet mask of MX60-D2
<b>Default Gateway</b>	Default Gateway address of MX60-D2
<b>Primary DNS</b>	Primary DNS address of MX60-D2
<b>Listen Port/Software IP(status)</b>	Listen Port and Networking Software IP address ( status : Online or Offline)
<b>WEB Management Port</b>	WEB communication number of MX60-D2
<b>Registered User</b>	Registered user number of MX60-D2
<b>Available User Capacity</b>	Available Capacity of MX60-D2 to register users; Available user number(s) to be registered = Sum (20000) – Registered user(s)
<b>Access/System Log Count</b>	The Sum from access and system logs of MX60-D2
<b>Reader Type</b>	Indicated connected reader format (default is WG34)
<b>Anti-Pass-Back (Tolerance Time)</b>	Current APB status (Enable or Disable) on MX60-D2, indicating with (APB Tolerance Time)
<b>Anti-Duress</b>	Current Anti-Duress status (Enable or Disable) on MX60-D2.
<b>Next MX60(status)</b>	IP Address of Next MX60-D2 which interaction with first APB (anti pass-back) function and Fire Alarm door emergency open. Also indicating with connectivity status ( Online or Offline)

## ◆ Terminal Setup

Select and Click "Terminal Setup" on the left side of the Main Window, you'll see the "TERMINAL CONFIGURATION", referring to the following picture:

### Terminal Configuration

**Terminal Setting :** Terminal ID :

\*IP Address :  .  .  .

\*Subnet Mask :  .  .  .

\*Gateway :  .  .  .

\*DNS Server :  .  .  .

**Software :** \*TCP Port(Software Used) :  \*Software IP :

**Web Language :**  ▼

**Anti Pass Back :**  Enable  Anti Follow  Disable

Tolerance Timer  (Minute, Maximum 65535, 0 means No Tolerance)

**Anti Duressed :**  Enable  Disable

Password \*  (Max 3 digits,default is 9)

**WEB Managemant Port :** Http Port:

**Next SEMAC(for APB):** IP Address :  .  .  .

**Fast Reg Card Mode :**  Enable  Disable

Terminal may need to restart after configuration saved.

## ◆ Illustration of Terminal Configuration

▶ Terminal Configuration	
<b>Terminal Setting: Terminal ID</b>	Setting Terminal ID for current MX60-D2. Default ID=1, max. 65,535 (Terminal ID should not be duplicated in one system)
<b>IP Address</b>	Setting IP Address of MX60-D2.
<b>Subnet Mask</b>	Setting Subnet Mask of MX60-D2
<b>Gateway</b>	Setting Default Gateway of MX60-D2
<b>DNS Server IP Address</b>	Setting the DNS Server IP Address of MX60-D2. Default DNS Server IP Address is 168.95.1.1.
▶ Software	
<b>TCP Port (Software Used)</b>	Setting a TCP Port for Software to communicate with MX60-D2. Default TCP Port No. is 2000
<b>Software IP</b>	For setting the Software IP to communicate with MX60-D2. Default Software IP is 0.0.0.0.
▶ Web Language	
<b>English</b>	When you choose the "English" language from the "Drop Down Menu", the WEB page of MX60-D2 will be switched to "English" interface .
<b>Chs</b>	When you choose the "Chs" language from the "Drop Down Menu", the WEB page of MX60-D2 will be switched to "Simplified Chinese" interface .
<b>Others</b>	When you choose "Others" from the "Drop Down Menu", the WEB page of MX60-D2 will be switched to "Traditional Chinese" interface or other languages.
▶ Anti Pass Back	
<b>Enable</b>	Tick this circle to enable the "APB"(Anti Pass Pack) function.
<b>Anti Follow</b>	Automatically set all door(s) with APB level: Entry (IN): 1, Exit (OUT):2. User should access door only from Entry side then exit from Exit side.
<b>Disable</b>	Tick this circle to disable the "APB"(Anti Pass Pack) function.
<b>Tolerance Time</b>	Set a time that system will be restored to original status after "APB" triggered. The unit of time can be 0~65535(minute). For value set to "0" which indicated APB function will not be restored to normal after certain time until manually disable "APB" function. (Default value=0)
▶ Anti Duress	
<b>Enable</b>	Tick this circle to enable the "Anti Duress" function.
<b>Disable</b>	Tick this circle to disable the "Anti Duress"function.
<b>Password</b>	Set a set of password for "Anti Duress" function. Default value = 9, max. 3 digits.
▶ WEB Management Port	
<b>Http Port</b>	Set your WEB communication port for MX60-D2, default value=80.
▶ Next MX60( for APB)	
<b>IP Address</b>	Set IP address for Next MX60-D2. All the APB level setting from first MX60-D2 will be copied to next MX60-D2.
▶ Button	
<b>Save</b>	Save the Terminal configuration settings.

## ◆ Password Setup

Select "Password Setup" on the left side of the Main Window, you'll see the "WEB Logon Setting/Entrance Password" screen, referring to the following picture:

### WEB Logon Setting

---

Administrator WEB Logon User Name :  (47 Char. Max)  
Administrator WEB Logon Password :  (35 Char. Max)

Operator WEB Logon User Name :  (47 Char. Max)  
Operator WEB Logon Password :  (35 Char. Max)

USER WEB Logon User Name :  (47 Char. Max)  
USER WEB Logon Password :  (35 Char. Max)

### Entrance Password

---

Administrator Password :  (4 ~ 8 digits.)  
Common Password :  (4 ~ 8 digits.)

## ◆ Illustration of WEB Logon Setting/Entrance Password

▶ WEB Logon Setting	
<b>Administrator WEB Logon User Name</b>	Input the required Administrator's logon user name for WEB management, max. 47 characters, default value: "admin".
<b>Administrator WEB Logon Password</b>	Input the required Administrator's logon password for WEB management, max. 35 digits, default value: "admin".
<b>Operator WEB Logon User Name</b>	Input the required Operator's logon user name for WEB management, max. 47 characters, default value: "user".
<b>Operator WEB Logon Password</b>	Input the required Operator's logon password for WEB management, max. 35 digits, default value: "user".
<b>User WEB Logon User Name</b>	Input the required User's logon user name for WEB management, max. 47 characters, default value: "user0".
<b>User WEB Logon Password</b>	Input the required User's logon user name for WEB management, max. 35 digits, default value: "user0".
The Administrator, Operator and User have their respective authorizations, referring to the following "Authorization Table".	
▶ Button	
<b>Save</b>	Save all the WEB Logon Settings.
▶ Entrance Password	
<b>Common Password</b>	Set your "Common Password" here. Meanwhile, you have to select "001 Any Time "for "Common Password Time Zone " simultaneously to support this setting ( for example: Door Setup→Door Setting→Click "Door1"→Door 1 Setting→ Select "Common Password Time Zone "→ Select "001 Any Time "from the "Drop Down Menu"). Default value: "1234".
▶ Button	
<b>Save</b>	Save the Password setting.

## ◆ Illustrations of Door 1 Setting in Door Setup

▶ Door 1 Setting	
<p><b>First Admin Card IN Time Zone</b></p>	<p>Set up the time zone of First Administrator's Card to open the door as the bypass time zone of Door ( default- "000 Deactivate"). When this time zone is chosen, the user can only use the card of Administrator to scan/sweep the controller first and the other users may enter Door 1. Nobody may enter without using this First Admin Card to scan the controller of Door in advance.</p> <p>※ Should the user's bypass time zone level is L10, he/she may access by scanning the card and enter the Door directly; however when the bypass time zone setup of Door is " Lock Release Time Zone ", the user may access directly without any limitation.</p>
<p><b>Multiple Badge +Admin Password Time Zone</b></p>	<p>Set up the Multiple Badge + Administrator Password time zone as the bypass time zone of Door ( default- "000 Deactivate"). <b>Before setting this time zone, you must choose the function of " Multi Badge Group "to come to the "Multi Badge Group " screen and give the user ID in this time zone, max. 3 user IDs allowed;</b> the user needs both 2 or 3 user ID cards and the Administrator's password to enter the Door successfully. No any order limitation for scanning the cards first or enter the password first. You may scan the cards first then enter the password, or in reverse order.</p> <p>※ Should the user's bypass time zone level is L9~L10, he/she may access by scanning the card and enter the Door directly; however when the bypass time zone setup of Door is " Lock Release Time Zone ", the user may access directly without any limitation.</p>
<p><b>Multiple Badge +Personal Password Time Zone</b></p>	<p>Set up the Multiple Badge + Personal Password time zone as the bypass time zone of Door ( default-000 Deactivate"). <b>Before setting this time zone, you must choose the function of "Multi Badge Group"to come to the "Multi Badge Group" screen and give the user ID in this time zone, max. 3 user IDs allowed;</b> the user needs both 2 or 3 user ID cards and the Personal password to enter the Door successfully. No any order limitation for scanning the cards first or enter the password first. You may scan the cards first then enter the password, or in reverse order. However, the order of personal passwords will make differences. For example, there are two cards + passwords belonged to A and B. Should A card be scanned first, A has to enter his/her password first. Password B is not allowed to be entered before Password A.</p> <p>※ Should the user's bypass time zone level is L8~L10, he/she may access by scanning the card and enter the Door directly; however when the bypass time zone setup of Door is " Lock Release Time Zone ", the user may access directly without any limitation.</p>

<p><b>Multiple Badge Time Zone</b></p>	<p>Set up the Multiple Badge time zone as the bypass time zone of Door ( default-“ 000 Deactivate“). <b>Before setting this time zone, you must choose the function of “Multi Badge Group”to come to the “Multi Badge Group” screen and give the user ID in this time zone, max. 3 user IDs allowed;</b> the user needs both 2 or 3 user ID cards to enter the Door successfully. No any order limitation for scanning the cards          ※ Should the user’s bypass time zone level is L7~L10, he/she may access by scanning the card and enter the Door directly; however when the bypass time zone setup of Door is“ Lock Release Time Zone “, the user may access directly without any limitation.</p>
<p><b>Card +Admin Password Time Zone</b></p>	<p>Set up the Card + Admin Password time zone as the bypass time zone of Door (default-“ 000 Deactivate“). The user has to scan the card and enter the Admin Password to access Door. No any order limitation for scanning the cards first or enter the password first.          ※ Should the user’s bypass time zone level is L6~L10, he/she may access by scanning the card and enter the Door directly; however when the bypass time zone setup of Door is“ Lock Release Time Zone “, the user may access directly without any limitation.</p>
<p><b>Admin Password Time Zone</b></p>	<p>Set up the Admin Password time zone as the bypass time zone of Door (default-“000 Deactivate“). The user has to enter the Admin Password to access Door.          ※ Should the user’s bypass time zone level is L5~L10, he/she may access by scanning the card and enter Door directly; however when the bypass time zone setup of Door is“ Lock Release Time Zone “, the user may access directly without any limitation.</p>
<p><b>Card +Personal Password Time Zone</b></p>	<p>Set up the Card+ Personal Password time zone as the bypass time zone of Door ( default-“ 000 Deactivate“). The user has to scan the card and enter the Personal Password to access Door. No any order limitation for scanning the cards first or enter the password first.          ※ Should the user’s bypass time zone level is L4~L10, he/she may access by scanning the card and enter Door directly; however when the bypass time zone setup of Door is“ Lock Release Time Zone “, the user may access directly without any limitation.</p>
<p><b>Password Time Zone</b></p>	<p>Set up the Common Password time zone as the bypass time zone of Door (default-“000 Deactivate“). The user has to enter the Common Password to access Door.          ※ Should the user’s bypass time zone level is L3~L10, he/she may access by scanning the card and enter Door directly; however when the bypass time zone setup of Door is“ Lock Release Time Zone “, the user may access directly without any limitation.</p>

<b>Card Only Time Zone</b>	<p>Set up the Card Only time zone as the bypass time zone of Door ( default –“ 000 Deactivate“). The user has to scan the card to access Door.</p> <p>※ Should the user’s bypass time zone level is L2~L10, he/she may access by scanning the card and enter Door directly; however when the bypass time zone setup of Door is“ Lock Release Time Zone “, the user may access directly without any limitation.</p>
<b>Card or Password Time Zone</b>	<p>Set up the Card or Common Password time zone as the bypass time zone of Door ( default as “ 001 Any Time“). The user has to scan the card or enter the Common Password to access Door.</p> <p>※ Should the user’s bypass time zone level is L1~L10, he/she may access by scanning the card and enter Door directly; however when the bypass time zone setup of Door is“ Lock Release Time Zone “, the user may access directly without any limitation.</p>
<b>Lock Release Time Zone</b>	<p>Set up the Lock Release time zone as the bypass time zone of Door (default–“000 Deactivate“). The user needs no any verification to access Door; however, if the“First Card”setup is “Needed”, the use has to scan a “First Card”in advance to activate the “Lock Release Time Zone” function.</p>
<b>Exit Button TZ</b>	<p>Set up the Exit Button time zone as the bypass time zone of Door, supporting “OUT ”for Door only (default as “ 001 Any Time“).</p>
<b>Anti Pass Back Level</b>	<p>Set up the Anti Pass Back Level of “IN” and “OUT” for Door, level 0~255.</p>
<b>Dual Interlocking</b>	<p>Disable or Enable the “Dual Interlocking” function. Upon this function enabled, the user enters Door and cannot enter the other door until Door close.</p>
<b>Remote Grant</b>	<p>Disable or Enable the “Remote Grant” access control function. Upon this function enabled, the Software will take a remote control over the door’s open or close.</p>
<b>Lock Release Time</b>	<p>Set up the “Lock Release Time”, default as 10 seconds.</p>
<b>Door Open Delay Time</b>	<p>Set up “Door Open Delay Time” , default as 10 seconds.</p>
<b>Access Log / Door Sensor Mode</b>	<p>Set up “Ignored” or “Recorded”the Access Log (default as “Recorded”)</p> <p>Set up Door Sensor Mode, options for “Normal Open/Close” or “Circuit Short/Open” (default as “Normal Open/Close”). Should it is “Circuit Short/Open ” selected, the Door Setting will display “Circuit Short” when the door is in short circuit or broken.</p>
<b>Still Open Delay Time</b>	<p>Set a time from 0~255 seconds for adjusting door sensor/relay reaction time difference</p>
<b>Degrade Mode</b>	<p>Select system verification mode: Deactivated/Registered/FC/ALL</p>

Remarks: Same setting for door 1 ~Door 2

## ◆ Remote Control

Select and Click "Remote Control" on the left side of the Main Window, you'll see the "Door Status Monitoring /Security Bypass" screen as below:

### Door Status Monitoring

● No Response ● close ● open ● Circuit Short,Circuit Open,Intrude,Open too long

Door 1      Door 2

Door State	●	●	
Fire Alarm Detection	off	Defense State	off

### Security Bypass

	Door 1	Door 2
State	Normal	Normal

Door 1  Door 2

## ◆ Illustrations of Door Status Monitoring/Security Bypass

▶ Door Status Monitoring	
<b>Door Status</b>	Display the most updated status from Door 1 to Door 2. No light Displayed indicated no response Green light indicated door closed Yellow light indicated door opened Red light indicated abnormal status (for example, short circuit, intruded, door opened too long, and so on)
<b>Fire Alarm Detection</b>	Display whether the “ Fire Alarm Detection ”function enabled or not.
<b>Defense State</b>	Display whether the “ Defense State ”function enabled or not.
▶ Security Bypass	
<b>State</b>	Display the “Security Bypass State” from Door 1 to Door 2, Normal/Force Open/Force Close.
<b>Door 1</b>	Tick the box of Door 1 to monitor the Security Bypass of Door 1.
<b>Door 2</b>	Tick the box of Door 2 to monitor the Security Bypass of Door 2.
<b>Select All</b>	Click this button and tick all the boxes from Door 1 to Door 2.
<b>Cancel All</b>	Click this button and cancel all the ticks of the boxes before Door 1 ~ Door 2.
<b>Pulse Open Door</b>	Click this button to open the door(s) remotely for all the door(s) ticked. This function works when the Security Bypass state is normal.
<b>Force Close</b>	Click this button to make a force close on the door(s) remotely for all the door(s) ticked. Hence the state(s) of all the door(s) ticked will display “Force Close “. Even the RFID card scanned through the door(s), you may not access the door(s).
<b>Back to Normal</b>	Click this button to remotely restore all the door(s) ticked back to normal Security Bypass status.
<b>Force Open</b>	Click this button to make a force open on the door(s) remotely for all the door(s) ticked. Hence the state(s) of all the door(s) ticked will display “Force Open “ and the door(s) will stay at “Lock Release ” status.
<b>Emergency Open All Door</b>	Click this button to make a force open on all the door(s) remotely and the door(s) will stay at “Lock Release” status.
<b>Emergency Close All Door</b>	Click this button to make a force close on all the door(s) remotely and the door(s) cannot be accessed normally.
<b>Fire Alarm Detection ON</b>	Click this button to activate the “Fire Alarm Detection” function and the door(s) state will display “on”.
<b>Fire Alarm Detection OFF</b>	Click this button to deactivate the “Fire Alarm Detection” function and the door(s) state will display “off”.
<b>Alarm OFF</b>	Click this button to deactivate all the Alarms already triggered.

## ◆ Event Handle

Select "Event Handle" on the left side of the Main Window, you'll see the "Event Handle" screen as below:

### Event Handle

## ◆ Illustration of Event Handle

▶ Event Type	
<b>Latched Time</b>	<p>Set a latched time (0~65535 seconds) for Hard Alarm/Soft Alarm 1/Soft Alarm 2/IP Camera event trigger.</p> <p><b>Hard Alarm: Set Event to Trigger Hard Alarm</b></p> <p><b>Hard Alarm</b></p> <hr/> <p>Latched Time <input type="text" value="0"/> (sec,Max 65535 : 0 means unlimited)</p> <p> <input type="checkbox"/> Unregistered User    <input type="checkbox"/> Deactivated User    <input type="checkbox"/> Not Allowed Door    <input type="checkbox"/> Time Zone Violation    <input type="checkbox"/> Expired User  <input type="checkbox"/> Anti Pass Back Violation    <input type="checkbox"/> Door open too long    <input type="checkbox"/> Door Intruded    <input type="checkbox"/> Duress Alarm On    <input type="checkbox"/> Fire Alarm On </p> <p><input type="button" value="Set"/></p> <p><b>Soft Alarm 1 / Soft Alarm 2 :</b></p> <p><b>Soft Alarm1</b></p> <hr/> <p>Latched Time <input type="text" value="0"/> (sec,Max 65535 : 0 means unlimited)</p> <p> <input type="checkbox"/> Unregistered User    <input type="checkbox"/> Deactivated User    <input type="checkbox"/> Not Allowed Door    <input type="checkbox"/> Time Zone Violation    <input type="checkbox"/> Expired User  <input type="checkbox"/> Anti Pass Back Violation    <input type="checkbox"/> Door open too long    <input type="checkbox"/> Door Intruded    <input type="checkbox"/> Duress Alarm On    <input type="checkbox"/> Fire Alarm On </p> <p><input type="button" value="Set"/></p> <p><b>Soft Alarm2</b></p> <hr/> <p>Latched Time <input type="text" value="0"/> (sec,Max 65535 : 0 means unlimited)</p> <p> <input type="checkbox"/> Unregistered User    <input type="checkbox"/> Deactivated User    <input type="checkbox"/> Not Allowed Door    <input type="checkbox"/> Time Zone Violation    <input type="checkbox"/> Expired User  <input type="checkbox"/> Anti Pass Back Violation    <input type="checkbox"/> Door open too long    <input type="checkbox"/> Door Intruded    <input type="checkbox"/> Duress Alarm On    <input type="checkbox"/> Fire Alarm On </p> <p><input type="button" value="Set"/></p> <p><b>IP Camera: Even trigger type from IP Camera</b></p> <p><b>IP Camera</b></p> <hr/> <p> <input type="checkbox"/> Unregistered User    <input type="checkbox"/> Deactivated User    <input type="checkbox"/> Not Allowed Door    <input type="checkbox"/> Time Zone Violation    <input type="checkbox"/> Expired User  <input type="checkbox"/> Anti Pass Back Violation    <input type="checkbox"/> Door open too long    <input type="checkbox"/> Door Intruded    <input type="checkbox"/> Duress Alarm On    <input type="checkbox"/> Fire Alarm On </p> <p><input type="button" value="Set"/></p>
<b>Unregistered User</b>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the user unregistered, one unregistered record will be shown on the “ Access Log ”screen (referring to the sample as below); if the event level equal to or higher than the “Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0, referring to the below picture :</p>

<p><b>Deactivated User</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the user deactivated, one “Deactivated” message will be recorded and shown on the “Access Log” screen (referring to the example as below); if the event level equal to or higher than the “Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “E-mail Alerts” is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0.</p>
<p><b>Not Allowed Door</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the user’s “Group” setting different from the Door Settings, one “DISALLOWED DOOR” message will be recorded and shown on the “ Access Log ”screen; if the event level equal to or higher than the “Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out. (referring to below examples of user’s Group setting and Door setting) ( steps : Access Log→Click the User ID→Enter the “User RECORD” screen to modify the configuration of “Group”)</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0.</p>
<p><b>Multi-Badge Violation</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the “Multi-Badge “ verification failed, one “(1)DOUBLE REJ” message will be recorded and shown on the “ Access Log” screen (referring to the example as below); if the event level equal to or higher than the” Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0.</p>
<p><b>Time Zone Violation</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the user’s “Group” setting different from the Door Settings, one “(1)Open Time Error ”message will be recorded and shown on the Access Log ”screen (referring to the example as below); if the event level equal to or higher than the“ Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0.</p>

<p><b>Expired User</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the user’s “Expiry Date” overdue, one “(1)EXPIRED ”message will be recorded and shown on the Access Log ”screen (referring to the example as below); if the event level equal to or higher than the“ Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0.</p>
<p><b>Anti Pass Back Violation</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the doors with “Anti Pass Back Level ”configuration, one “(1)ANTI_PB REJ ”message will be recorded and shown on the Access Log ”screen (referring to the example as below); if the event level equal to or higher than the“ Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0.</p> <p>※Only 1 Door (2 way ) is supported with this function.</p>
<p><b>Door open too long</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the door closes over the time set after the user card being scanned, one “(O)Open too long ”message will be recorded and shown on the Access Log ”screen (referring to the example as below); if the event level equal to or higher than the“ Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 0.</p>
<p><b>Door Intruded</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the door is accessed forcibly and abnormally, one “(O) DOOR INTRUDED ” message will be shown on the Access Log ”screen (referring to the example as below); if the event level equal to or higher than the “ Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 4.</p>

<p><b>Duress Alarm On</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and the “Duress Alarm ”of a door is triggered by the user ( note : you have to key in the “Anti Duress Password” and press “ENT ”before scanning the user card), one “ANTI DURESS” message will be shown on the Access Log ”screen; if the event level equal to or higher than the “ Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 4.</p>
<p><b>Fire Alarm On</b></p>	<p>1、It will be listed in the “Drop Down Menu”. When it’s selected and if the “Fire Alarm ”is triggered, one “FIRE ALARM” message will be recorded and shown on the Access Log ”screen; if the event level equal to or higher than the “ Alarm Trigger Level”, the Relay will be triggered and the E-mail will alert when “ E-mail Alerts ”is configured and one alert e-mail will be sent out.</p> <p>2、When the “Latched Time : 0”, the alert can only be lifted/stopped by clicking “ Alarm OFF ”button on the “Door Status Monitoring/Security Bypass” screen of “Remote Control” function, default level = 5.</p>

## ◆ Multi Badge Group

Select and Click "Multi Badge Group" on the left side of the Main Window, you'll see the "Multi Badge Group" screen as below:

### Multi Badge Group

Multi Badge Group	User ID 1	User ID 2	User ID 3
1.	<input type="text"/>	<input type="text"/>	<input type="text"/>

<b>User ID 1</b>	Enter the User ID 1 for Multi Badge Group.
<b>User ID 2</b>	Enter the User ID 2 for Multi Badge Group.
<b>User ID 3</b>	Enter the User ID 3 for Multi Badge Group.
<b>Set ( button)</b>	Save all the configurations.

## ➤ Tools

### ◆ IP Camera

Select "IP Camera" on the left side of the Main Window, you'll see the "IP Camera" screen as the following example:

IP Camera(IP)	PORT	TYPE	username (30 Char. Max)	password (30 Char. Max)	IN Camera ID (1~16)	OU1 Camera ID (1~16)	Door 1	Door 2
1. <input type="text" value="0.0.0.0"/>	<input type="text" value="80"/>	VIVOTEK IP7133/7330 ▼	<input type="text"/>	<input type="text"/>			---	---
2. <input type="text" value="0.0.0.0"/>	<input type="text" value="80"/>	VIVOTEK IP7133/7330 ▼	<input type="text"/>	<input type="text"/>				

### ◆ Illustration of IP Camera

▶ IP Camera	
<b>IP Camera 1</b>	Enter the IP address of IP Camera 1 to be lined.
<b>IP Camera 2</b>	Enter the IP address of IP Camera 2 to be lined.
<b>Door 1</b>	Display the captured and the most updated picture of Door 1.
<b>Door 2</b>	Display the captured and the most updated picture of Door 2.
<b>Set ( button)</b>	Save all the configurations.
<b>Refresh ( button)</b>	Refresh the WEB page of IP Camera.

### ◆ Backup

MX60-D system can be backup for restore to system again by selecting: Database/User Data/User list, as below:

#### Backup

---

**Tips :**

**This command will export the User Registry data for backup purpose.**

Database(database.cfg)
  User Data(userdata.cfg)
  User List(userlist.txt)

## ◆ Restore

MX60-D system can be backup and restore to MX60-D again. Only Database/User List available.

### RESTORE / IMPORT

---

Select a File to Restore / Import :

 瀏覽...

Database(database.cfg/userdata.cfg)  User List(userlist.txt)

---

(It may takes few minutes to restore the database.)

Restore

## ◆ Reboot

Select "Reboot" on the left side of the Main Window, you'll see the "Reboot System" screen as below:

### Reboot System

---

REBOOT

---

## ◆ Illustration of Reboot

### ► Button

Reboot	Reboot the MX60-D2, similar to warm boot a computer.
--------	--

## ◆ Upgrade Firmware

Select "Upgrade FIRMWARE" on the left side of the Main Window, you'll see the "FIRMWARE UPGRADE" screen as below:

### FIRMWAVE UPGRADE

---

Warning: Upgrade must NOT be interrupted

Please select a file to upgrade :  瀏覽...

UPGRADE

---

## ◆ Illustration of Upgrade Firmware

### ► Steps

Press button "Browse" to search your firmware to be upgraded.

Press button "Upgrade" to execute the firmware upgrade action.

### ► Note

Please upgrade the "System Code" first then upgrade "WEB code".

## ◆ Reset

Select "Reset" on the left side of the Main Window, you'll see the "Reset" screen as below:

### Reset

User Data
  Access Logs
  Group
  Time Zone
  Time Set
  Holiday
  System Logs

**Reset System to Factory Default** -
